Volume Contents

Number 1. January

1 Changes in Isoperoxidases during Cold Treatment of Dormant Pear Embryo. KAR-LING TAO AND ANWAR A. KHAN

5 Influence of Ionic Strength, pH, and Chelation of Divalent Metals on Isolation of Polyribosomes from Tobacco Leaves. ANDREW O. JACKSON AND BRIAN A. LARKINS

11 Effects of Water Stress on the Ultrastructure of Leaf Cells of *Sorghum bicolor*. KENNETH L. GILES, DANIEL COHEN, AND MICHAEL F. BEARDSELL

15 Incorporation of Cytokinin N^6-Benzyladenine into Tobacco Callus Transfer Ribonucleic Acid and Ribosomal Ribonucleic Acid Preparations. DONALD J. ARMSTRONG, NORIMOTO MURAI, BARBARA J. TALLER, AND FOLKE SKOOG

23 Some Regulatory Properties of Pea Leaf Carbamoyl Phosphate Synthetase. THOMAS DENNY O'NEAL AND AUBREY W. NAYLOR

29 Attempts to Detect Cyclic Adenosine 3':5'-Monophosphate in Higher Plants by Three Assay Methods. RAY A. BRESSAN, CLEON W. ROSS, AND JOZEF VANDEPEUTE

38 Manipulation of Galactolipid Fatty Acid Composition with Substituted Pyridazinones. JUDITH B. ST. JOHN

41 Chloroplast Growth and Replication in Germinating Spinach Cotyledons following Massive γ-Irradiation of the Seed. RAY ROSE AND JOHN POSSINGHAM

47 The Light-harvesting Chlorophyll *a*/*b*-Protein Complex of *Chlamydomonas reinhardii*. KUEY-SUEY KAN AND J. PHILIP THORNBER

53 Distribution of Protein-bound Hexosamine in Chloroplasts. DAVID RACUSEN AND RAYMOND P. POINCELOT

55 Nitrate Absorption by Barley. I. Kinetics and Energetics. K. PRASAD RAO AND D. WILLIAM RAINS

59 Nitrate Absorption by Barley. II. Influence of Nitrate Reductase Activity. K. PRASAD RAO AND D. WILLIAM RAINS

63 Pyrophosphorylases in *Solanum tuberosum*. I. Changes in ADP-Glucose and UPD-Glucose Pyrophosphorylase Activities Associated with Starch Biosynthesis during Tuberization, Maturation, and Storage of Potatoes. JOSEPH R. SOWOKINOS

69 Analysis of Steady State Photosynthesis in Alfalfa Leaves. STEVEN G. PLATT, SVI PLAUT, AND JAMES A. BASSHAM

74 Cell Isoperoxidases in Sweet Potato Plants in Relation to Mechanical Injury and Ethylene. HELENA BIRECKA, JAMES CATALFAMO, AND PAUL URBAN

80 Rapid Metabolic Changes in the Wounding Response of Leaf Discs following Excision. PETER K. MACNICOL

85 *In Vivo* Conversion of 5-Oxoproline to Glutamate by Higher Plants. MENDEL MAZELIS AND HELEN M. PRATT

88 Stimulation of Ethylene Production in the Mung Bean Hypocotyls by Cupric Ion, Calcium Ion, and Kinetin. OI-LIM LAU AND SHANG F. YANG

93 Glycoprotein Metabolism in the Cotyledons of *Pisum sativum* during Development and Germination. SHAIK M. M. BASHA AND LEONARD BEEVERS

98 Nonmetabolic Catalysis of ^{14}C-Furfuryl Amino Purine (Kinetin) on Plant Surfaces, Glass, and Porcelain Ware. ROY M. SACHS, KAY RYUGO, AND OLAV MESSERSCHMIDT

101 Some Physical Characteristics of the Enzymes of L-Tryptophan Biosynthesis in Higher Plants. CHARLES N. HANKINS, MICHAEL T. LARGEN, AND STANLEY E. MILLS

105 Isolation of Plasma Membranes from Corn Roots by Sucrose Density Gradient Centrifugation. An Anomalous Effect of Ficoll. ROBERT T. LEONARD AND WILLIAM J. VANDERWOUDE

115 Abscisic Acid Content and Stomatal Sensitivity to CO_2 in Leaves of *Xanthium strumarium* L. after Pretreatments in Warm and Cold Growth Chambers. KLAUS RASCHKE, MARGARET PIERCE, AND CHU CHEN POPIELA

i Instructions for Contributors

Number 2. February

123 Transmembrane Electropotential in Barley Roots as Related to Cell Type, Cell Location, and Cutting and Aging Effects. STUART M. MERTZ, JR. AND NOE HIGINBOTHAM

129 Electrochemical Gradients and K^+ and Cl^- Fluxes in Excised Corn Roots. ROBERT F. DAVIS AND NOE HIGINBOTHAM

137 Electrical Resistances of Corn Root Segments. W. P. ANDERSON AND NOE HIGINBOTHAM

142 Separation and Characterization of Potato Lipid Acylhydrolases. EDNA P. HASSON AND GEORGE G. LATIES

148 Purification and Characterization of an A Type Phospholipase from Potato and Its Effect on Potato Mitochondria. EDNA P. HASSON AND GEORGE G. LATIES

153 Water Uptake and Water Diffusivity of Seeds. PAUL E. WAGGONER AND JEAN-YVES PARLANGE

157 Interactive Effects of Salinity and Phosphorus Nutrition of the Concentrations of Phosphate and Phosphate Esters in Mature Photosynthesizing Corn Leaves. RICHARD H. NIEMAN AND ROBERT A. CLARK

162 Genotypic Responses to Salinity. Differences between Salt-sensitive and Salt-tolerant Genotypes of the Tomato. DALE W. RUSH AND EMANUEL EPSTEIN
167 Effect of Salinity on Respiratory Pathways in Root Tips of *Tamarix tetragyna*. ARYE KALIR AND ALEXANDRA POLJAKOFF-MAYBER
171 Influence of *Helminthosporium maydis*, Race T, Toxin on Potassium Uptake in Maize Roots. HUGH FRICK, RALPH L. NICHOLSON, THOMAS K. HODGES, AND LOYAL F. BAUMAN

175 Response of Barley Aleurone Layers to Abscisic Acid. DAVID TUAN-HUA HO AND JOSEPH E. VARNER
179 Galactolipid Synthesis in *Vicia faba* Leaves. II. Formation and Desaturation of Long Chain Fatty Acids in Phosphatidylcholine, Phosphatidylglycerol, and the Galactolipids. JOHN P. WILLIAMS, GARRY R. WATSON, AND STEPHEN P. K. LEUNG
185 Lack of Influence of Phytochrome on Membrane Permeability to Tritiated Water. CARL S. PIKE
188 Phytochrome Stability *in Vitro*. II. A Low Molecular Weight Protective Factor. STEPHEN G. LISANSKY AND ARTHUR W. GALSTON
192 Photosynthetic Independence of Light-induced Anthocyanin Formation in *Zea* Seedlings. STEPHEN O. DUKE, SUE B. FOX, AND AUBREY W. NAYLOR
197 Bound Auxin Formation in Growing Stems. PETER J. DAVIES
203 Stepwise Generation of the Natural Oxidant in a Reconstituted Chloroplast System. DAVID A. WALKER AND ANTONI R. SLABAS
209 Light Modulation of Enzyme Activity in Chloroplasts. Generation of Membrane-bound Vicinal-Dithiol Groups by Photosynthetic Electron Transport. LOUISE E. ANDERSON AND MORDHAY AVRON
214 Differential Accumulation of Proteinase Inhibitor I in Normal and Crown Gall Tissue of Tobacco, Tomato, and Potato. PETER P. WONG, TSUNGMIN KUO, CLARENCE A. RYAN, AND CLARENCE I. KADO
218 Phospholipid Synthesis and Exchange in Castor Bean Endosperm Homogenates. J. MICHAEL LORD
224 Glycosylated Seryl Residues in Wall Protein of Elongating Pea Stems. FRANS M. KLIS
227 Changes in Ascorbic Acid Content during Growth and Development of *Panicum miliaceum*. K. K. NANDA AND M. S. TAYAL
230 Effects of Kinetin and Root Tip Removal on Exudation and Potassium (Rubidium) Transport in Roots of Honey Locust. SUNG GAK HONG AND EDWARD SUCOFF
237 Effect of Glycidate on Glycolate Formation and Photosynthesis in Isolated Spinach Chloroplasts. RAYMOND CHOLLET
241 Effect of Benzyladenine, 2,4-Dichlorophenoxyacetic Acid, and D-Glucose on *myo*-Inositol Metabolism in *Acer pseudoplatanus* L. Cells Grown in Suspension Culture. DEVI C. VERMA, JAMES TAVARES, AND FRANK A. LOEWUS
245 Inhibition of *ent*-Kaurene Oxidation and Growth by α-Cyclopropyl-α-(*p*-methoxyphenyl)-5-pyrimidine Methyl Alcohol. RONALD C. COOLBAUGH AND ROXANNE HAMILTON
249 Studies on the Secretion of Maize Root Cap Slime. IV. Evidence for the Involvement of Dictyosomes. ROBERT E. PAULL AND RUSSELL L. JONES
257 Inhibition of Linolenic Acid Synthesis and Modification of Chilling Resistance in Cotton Seedlings. JUDITH B. ST. JOHN AND MERYL N. CHRISTIANSEN
260 Events Surrounding the Early Development of *Euglena* Chloroplasts. 7. Inhibition of Carotenoid Biosynthesis by the Herbicide SAN 9789 (4-Chloro-5-(methylamino)-2-(α,α,α-trifluoro-*m*-tolyl)-3-(2H)pyridazinone) and Its Developmental Consequences. ABRAHAM J. VAISBERG AND JEROME A. SCHIFF
270 Effect of Freezing and Cold Storage on Phospholipids in Developing Soybean Cotyledons. RICHARD F. WILSON AND ROBERT W. RINNE
274 Respiratory Transition during Seed Germination. SEMAHAT YENTUR AND A. CARL LEOPOLD
277 Effects of pH and Oxygen on Photosynthetic Reactions of Intact Chloroplasts. ULRICH HEBER, T. JOHN ANDREWS, AND N. KEITH BOARDMAN
284 Selection of Diquat Resistance Photosynthesis Mutants from Maize. C. DONALD MILES
286 Stem Sensitivity and Ethylene Involvement in Phototropism of Mung Bean. THOMAS BRENNAN, JAMES E. GUNCKEL, AND CHAIM FRENKEL
290 Osmotic Shrinkage as a Factor in Freezing Injury in Plant Tissue Cultures. LEIGH E. TOWILL AND PETER MAZUR
297 Peridinin-Chlorophyll *a* Proteins of the Dinoflagellate *Amphidinium carterae* (Plymouth 450). FRANCIS T. HAXO, J. HELEN KYCIA, G. FRED SOMERS, ALLEN BENNETT, AND HAROLD W. SIEGELMAN
304 Estimated Drainage of Carbon from the Tricarboxylic Acid Cycle for Protein Synthesis in Suspension Cultures of Paul's Scarlet Rose Cells. LARRY HUNT AND JOHN S. FLETCHER
308 The Occurrence of Peroxide in a Perennial Plant, *Populus gelrica*. SHONOSUKE SAGISAKA
310 Nicotinamide Adenine Dinucleotide-specific "Malic" Enzyme in *Kalanchoë daigremontiana* and Other Plants Exhibiting Crassulacean Acid Metabolism. PETER DITTRICH
315 Catalase, Peroxidase, and Polyphenoloxidase Activities during Rice Leaf Senescence. MANORANJAN KAR AND DINABANDHU MISHRA
320 Characteristics of a 4-Hydroxycinnamate Hydroxylase Purified from Sorghum Leaves. HELEN A. STAFFORD
325 Genotypic Variation in Carboxylation of Tomatoes. JIMMY J. AUGUSTINE, M. ALLEN STEVENS, R. WILLIAM BREIDENBACH, AND DAVID F. PAIGE
334 Isolation and Bicarbonate Transport of Chloroplast Envelope Membranes from Species of Differing Net Photosynthetic Efficiency. RAYMOND P. POINCELOT AND PETER R. DAY

Number 3. March

339 Glutamine Synthetase Regulation by Energy Charge in Sunflower Roots. GERARD S. WEISSMAN
344 Method for Growing Plants Aeroponically. RICHARD W. ZOBEL, PETER DEL TREDICI, AND JOHN G. TORREY
347 Calcium Requirement for Indoleacetic Acid-induced Acidification by *Avena* Coleoptiles. JERRY D. COHEN AND KENNETH D. NADLER
351 Developmental Expression of a Catalase Inhibitor in Maize. JOHN C. SORENSON AND JOHN G. SCANDALIOS
353 Boron Uptake by Excised Barley Roots. I. Uptake into the Free Space. JOHN E. BOWEN AND PER NISSEN
358 Morphology of *Arabidopsis* Grown under Chronic Centrifugation and on the Clinostat. ALLAN H. BROWN, A. ORVILLE DAHL, AND DAVID K. CHAPMAN
365 A Mung Bean Assay for Malformin-induced Growth Stimulation. ROY W. CURTIS
369 Changing Ratios of Phototransformable Protochlorophyll and Protochlorophyllide of Bean Seedlings Developing in the Dark. HAROLD A. LANCER, CHARLES E. COHEN, AND JEROME A. SCHIFF
375 Studies on Lipid Synthesis and Degradation in Developing Soybean Cotyledons. RICHARD F. WILSON AND ROBERT W. RINNE
382 Phosphatidylcholine Synthesis in Castor Bean Endosperm. THOMAS S. MOORE, Jr.
387 Interaction of N-Methylphenazinium Methyl Sulfate with the Thylakoids of Illuminated Chloroplasts in the Presence of 3-(3,4-Dichlorophenyl)-1,1-dimethylurea. PETER H. HOMANN
393 Cytokinins in *Vinca rosea* L. Crown Gall Tumor Tissue as Influenced by Compounds Containing Reduced Nitrogen. JAY B. PETERSON AND CARLOS O. MILLER
400 Interactions between Mitochondria and Chloroplasts in Cells. I. Action of Cyanide and of 3-(3,4-Dichlorophenyl)-1,1-dimethylurea on the Spore of *Funaria hygrometrica*. DANIEL CHAVALLIER, AND ROLAND DOUCE
403 Water Deficit and Ethylene Evolution by Young Cotton Bolls. GENE GUINN
406 Role of the Endoplasmic Reticulum in Glyoxysome Formation in Castor Bean Endosperm. ELMA GONZALEZ AND HARRY BEEVERS
410 Molecular Integrity of Plant Ribosomal Ribonucleic Acid. ANGUS G. HEPBURN AND JOHN INGLE
415 A Method for Eliminating the Contribution of *Agrobacterium tumefaciens* to Studies of Nucleic Acid Biosynthesis in Crown Gall Tumors. ANTHONY E. SOBOTA
420 Effects of Red Light and Ethylene on Growth of Etiolated Lettuce Seedlings. HARRY W. JANES, LARS LOERCHER, AND CHAIM FRENKEL
424 Influence of the Nutrient Medium on the Recovery of Dividing Cells from Tobacco Protoplasts. HIROFUMI UCHIMIYA AND TOSHIO MURASHIGE
430 Studies of Sulfate Utilization of Algae. 15. Enzymes of Assimilatory Sulfate Reduction in *Euglena* and Their Cellular Localization. CHRISTIAN BRUNOLD AND JEROME A. SCHIFF
437 Indoleacetic Acid Synthesis in Soybean Cotyledon Callus Tissue. ROBERT C. BLACK AND ROBERT H. HAMILTON
440 Action Spectrum between 260 and 800 Nanometers for the Photoinduction of Carotenoid Biosynthesis in *Neurospora crassa*. EDWARD C. DE FABO, ROY W. HARDING, AND W. SHROPSHIRE, JR.
446 Promotive Effects of Organic Solvents and Kinetin on Dark Germination of Lettuce Seeds. V. SIVAJI RAO, JOSEPH W. BRAUN, AND ANWAR A. KHAN
450 Organization of Electron Transport in Photosystem II of Spinach Chloroplasts According to Chelator Inhibition Sites. RITA BARR AND FREDERICK L. CRANE
454 Inhibition of Cottonseed Germination with Abscisic Acid and Its Reversal. JOHN M. HALLOIN
456 An Increase in Mechanical Extensibility during the Period of Light-stimulated Growth. JOSEPH K. E. ORTEGA AND R. IGOR GAMOW
458 Nitrate Reductase in Barley Roots under Sterile, Low Oxygen Conditions. DALE G. BLEVINS, RICHIE H. LOWE, AND LANA STAPLES
460 Turbidimetric Measurement of Plant Cell Culture Growth. ZINMAY RENEE SUNG
463 Corrections

Number 4. April

465 Mesophyll Resistance and Carboxylase Activity. A Comparison under Water Stress Conditions. JOHN C. O'TOOLE, R. KENT CROOKSTON, KENNETH J. TREHARNE, AND JIM L. OZBUN
469 Swelling and Contraction of Mitochondria from Cold-hardened and Nonhardened Wheat and Rye Seedlings. M. KEITH POMEROY
474 Seasonal Variation in the Hormone Content of Willow. I. Changes in Abscisic Acid Content and Cytokinin Activity in the Xylem Sap. RONALD ALVIM, ERROL W. HEWETT, AND PETER F. SAUNDERS
477 Effects of Sulfur on the Photosynthesis of Intact Leaves and Isolated Chloroplasts of Sugar Beets. NORMAN TERRY
480 Studies on the Carbon Dioxide Promotion and Ethylene Inhibition of Tuberization in Potato Explants Cultured *in Vitro*. ANGEL M. MINGO-CASTEL, ORRIN E. SMITH, AND JUNJI KUMAMOTO
486 Effect of Powdery Mildew Infection on Photosynthesis by Leaves and Chloroplasts of Sugar Beets. ANDREW C. MAGYAROSY, PETER SCHÜRMANN, AND BOB B. BUCHANAN
490 Endogenous Cytokinins in Maturing Manzanillo Olive Fruits. YAIV SHULMAN AND SHIMON LAVEE
493 Additive and Synergistic Growth-inhibiting Properties of the Canaline-Urea Cycle Amino Acids. GERALD A. ROSENTHAL, DUSHYANT K. GULATI, AND P. S. SABHARWAL
497 Synchronous Growth and Plastid Replication in the Naturally Wall-less Alga *Olisthodiscus luteus*. ROSE ANN

CATTOLICO, JOHN C. BOOTHROYD, AND SARAH P. GIBBS
504 Pigment Changes Associated with Application of Ethephon ((2-Chloroethyl)phosphonic Acid) to Fig (*Ficus carica* L.) Fruits. ANTOINE A. PUECH, CONSTANTIN A. REBEIZ, AND JULIAN C. CRANE
510 Membrane Lipid Metabolism in Germinating Castor Bean Endosperm. ROBERT P. DONALDSON
516 Polyribosomes from Peas. VI. Auxin-stimulated Recruitment of Free Monosomes into Membrane-bound Polysomes. ERIC DAVIES
519 *In Vivo* Nitrate Reduction in Relation to Nitrate Uptake, Nitrate Content, and *in Vitro* Nitrate Reductase Activity in Intact Barley Seedlings. WONGCHAN CHANTAROTWONG, RAY C. HUFFAKER, BRUCE L. MILLER, AND ROBERT C. GRANSTEDT
523 Relationship between Ethylene Evolution and Senescence in Morning-Glory Flower Tissue. HANS KENDE AND ANDREW D. HANSON
528 Methionine Metabolism and Ethylene Biosynthesis in Senescent Flower Tissue of Morning-Glory. ANDREW D. HANSON AND HANS KENDE
538 Biosynthesis of Wound Ethylene in Morning-Glory Flower Tissue. ANDREW D. HANSON AND HANS KENDE
542 Relation between Glutamine Synthetase and Nitrogenase Activities in the Symbiotic Association between *Rhizobium japonicum* and *Glycine max*. PAUL E. BISHOP, JUAN G. GUEVARA, JEAN A. ENGELKE, AND HAROLD J. EVANS
547 Aging Progression Involving Dwarfism and Its Acceleration by Red Light in Bean Hypocotyls. NOBUHARU GOTÔ AND YOHJI ESASHI
553 Interrelations between Environmental Factors and Freezing Resistance of Cabbage Leaves. WESLEY COX AND JACOB LEVITT
556 Involvement of Phospholipids in Triglyceride Biosynthesis by Developing Soybean Cotyledons. RICHARD F. WILSON AND ROBERT W. RINNE
560 Influence of Leaf Starch Concentration on CO_2 Assimilation in Soybean. EMERSON D. NAFZIGER AND H. RONALD KOLLER
564 Plant Desiccation and Protein Synthesis. III. Stability of Cytoplasmic RNA during Dehydration, and Its Synthesis on Rehydration of the Moss *Tortula ruralis*. EDWARD B. L. TUCKER AMD J. DEREK BEWLEY
568 Induction of Deoxyribonucleic Acid Synthesis in Potato Tuber Slices. Role of Protein Synthesis. AKIRA WATANABE AND HIDEMASA IMASEKI
572 Comparative Studies on the Induction and Inactivation of Nitrate Reductase in Corn Roots and Leaves. MUHAMMAD ASLAM AND ANN OAKS
577 Evidence for a Block between Plastoquinone and Cytochrome *f* in a Photosynthetic Mutant of *Lemna* with Abnormal Flowering Behavior. YOSEPHA SHAHAK, HERBERT B. POSNER, AND MORDHAY AVRON
580 Isotope Discrimination by Ribulose 1,5-Diphosphate Carboxylase. No Effect of Temperature or HCO_3^- Concentration. JOHN T. CHRISTELLER, WILLIAM A. LAING, AND JOHN H. TROUGHTON
583 Trypsin-induced ATPase Activity in Potato Mitochondria. DENNIS W. JUNG AND GEORGE G. LATIES
589 Development of Ribulose 1,5-Diphosphate Carboxylase in Nonphotosynthetic Endosperms of Germinating Castor Beans. LEE ANN FRY GILLEN, JOSHUA H. H. WONG, AND C. ROY BENEDICT
594 Events Surrounding the Early Development of *Euglena* Chloroplasts. VII. Photocontrol of the Source of Reducing Power for Chloramphenicol Reduction by the Ferredoxin-NADP Reductase System. ABRAHAM J. VAISBERG, JEROME A. SCHIFF, LYNN LI, AMD ZACHARY FREEDMAN
602 Identification of Cytokinins of Root Nodules of the Garden Pea, *Pisum sativum* L. KUNIHIKO SYŌNO AND JOHN G. TORREY
607 Effect of Removal of the Root Tip on the Development of Enhanced Rb^+ Absorption by Corn Roots. ROLANDO T. PARRONDO AND RICHARD C. SMITH
612 Effects of 35 C Heat Treatments on Photosensitive Grand Rapids Lettuce Seed Germination. NICHOLAS C. CARPITA AND MURRAY W. NABORS
617 Aggregate Formation from Short Fragments of Plant DNA. WILLIAM F. THOMPSON
623 Glutamine Synthesis and Its Relation to Photophosphorylation in *Pisum* Chloroplasts. Effects of 3-(3,4-Dichlorophenyl)-1,1-dimethylurea and Antimycin A. CURTIS V. GIVAN
628 Mercury-induced Ethylene Formation and Abscission in *Citrus* and *Coleus* Explants. RAPHAEL GOREN AND SANFORD M. SIEGEL
632 Sequence of Reactivation of Ribonucleic Acid Synthesis during Early Germination of the Maize Embryo. CLAUDE VAN DE WALLE, GEORGES BERNIER, ROGER DELTOUR, AND RAYMOND BRONCHART
640 Effects of Ancymidol (a Growth Retardant) and Triarimol (a Fungicide) on the Growth, Sterols, and Gibberellins of *Phaseolus vulgaris* (L.) JOHN B. SHIVE, JR. AND HUGH D. SISLER
645 Aliphatic Chains of Esterified Lipids in Isolated Eyespots of *Euglena gracilis* var. *bacillaris*. LULA L. HILENSKI, PATRICIA L. WALNE, AND FRED SNYDER
647 Autoinhibition of Ethylene Formation in Nonripening Stages of the Fruit of Sycomore Fig (*Ficus sycomorus* L.) M. ZERONI, J. GALIL, AND S. BEN-YEHOSHUA
651 Synergetic Cultures of *Glycine max* Root Cells and Rhizobia Separated by Membrane Filters. MINOCHER REPORTER
656 Leaf Cell Water and Enzyme Activity. SHOSHANA (MALIS) ARAD AND AMOS E. RICHMOND
659 Simultaneous Measurement of Oxygen and Hydrogen Exchange from the Blue-Green Alga *Anabaena*. LARRY W. JONES AND NORMAN I. BISHOP
666 Specificity of the Antheridogen from *Ceratopteris thalictroides* (L.) Brongn. MARK D. SCHEDLBAUER

670 Correlative Aspects of Imposition of Dormancy in Caryopses of *Aegilops kotschyi*. JUDITH WURZBURGER, Y. LESHEM, AND D. KOLLER

Number 5. May

673 Alterations in Chloroplast Thylakoids during an *in Vitro* Freeze-Thaw Cycle. MELVIN P. GARBER AND PETER L. STEPONKUS
681 Alterations in Chloroplast Thylakoids during Cold Acclimation. MELVIN P. GARBER AND PETER L. STEPONKUS
687 Lysine Catabolism in Barley (*Hordeum vulgare* L.). BIRGER LINDBERG MØLLER
693 Hydroxylamine Reductase Enzymes from Maize Scutellum and Their Relationship to Nitrite Reductase. DERECK P. HUCKLESBY AND RICHARD H. HAGEMAN
699 Effects of Light, Abscisic Acid, and ^{6}N-Benzyladenine on the Metabolism of [^{3}H]Gibberellin A_4 in Seeds and Seedlings of Lettuce, cv. Grand Rapids. RICHARD C. DURLEY, J. DEREK BEWLEY, IAN D. RAILTON, AND RICHARD P. PHARIS
704 Chloroplast Response to Low Leaf Water Potentials. IV. Quantum Yield Is Reduced. PRASANNA MOHANTY AND JOHN S. BOYER
710 Changes in Microsomal Enzymes and Phospholipid during Dehardening in Stem Bark of Black Locust. SHIZUO YOSHIDA
716 Cyclic Photophosphorylation in the Mykotrophic Orhid *Neottia nidus-avis*. WILHELM MENKE AND GEORG H. SCHMID
720 Extractant Influence on the Relationship between Extractable Proteins and Cold Tolerance of Alfalfa. WADE F. FAW, SAO C. SHIH, AND GERALD A. JUNG
724 Role of Galactolipids in Spinach Chloroplast Lamellar Membranes. II. Effects of Galactolipid Depletion on Phosphorylation and Electron Flow. ARTHUR B. SHAW, MARK M. ANDERSON, AND RICHARD E. MCCARTY
730 Differential Localization of Fraction I Protein between Chloroplast Types. STEVEN C. HUBER, TIMOTHY C. HALL, AND GERALD E. EDWARDS
734 Transport and Metabolism of ^{3}H-Gibberellin A_1 in Dioecious Cucumber Seedlings. JEHOSHUA RUDICH, HAROLD M. SELL, AND LARRY R. BAKER
738 Interaction between Osmotic- and Pressure-induced Water Flow in Plant Roots. EDWARD I. NEWMAN
740 Storage Protein Synthesis in Maize. Isolation of Zein-synthesizing Polyribosomes. BRIAN A. LARKINS, CHARLES E. BRACKER, AND C. Y. TSAI
746 Microencapsulation of Chloroplast Particles. M. KITAJIMA AND WARREN L. BUTLER
751 Host-Pathogen Interactions. IX. Quantitative Assays of Elicitor Activity and Characterization of the Elicitor Present in the Extracellular Medium of Cultures of *Phytophthora megasperma* var. *sojae*. ARTHUR R. AYERS, JÜRGEN EBEL, FREDERICK FINELLI, NATHAN BERGER, AND PETER ALBERSHEIM
760 Host-Pathogen Interactions. X. Fractionation and Biological Activity of an Elicitor Isolated from the Mycelial Walls of *Phytophthora megasperma* var. *sojae*. ARTHUR R. AYERS, JÜRGEN EBEL, BARBARA VALENT, AND PETER ALBERSHEIM
766 Host-Pathogen Interactions. XI. Composition and Structure of Wall-released Elicitor Fractions. ARTHUR R. AYERS, BARBARA VALENT, JÜRGEN EBEL, AND PETER ALBERSHEIM
775 Host-Pathogen Interactions. XII. Response of Suspension-cultured Soybean Cells to the Elicitor Isolated from *Phytophthora megasperma* var. *sojae*, a Fungal Pathogen of Soybeans. JÜRGEN EBEL, ARTHUR R. AYERS, AND PETER ALBERSHEIM
780 Lipoxygenase and Hydroperoxide Lyase in Germinating Watermelon Seedlings. BRADY A. VICK AND DON C. ZIMMERMAN
789 Sequential Changes in the Lipids of Developing Proplastids Isolated from Green Maize Leaves. BRENDA M. LEESE AND RACHEL M. LEECH
795 Partial Purification and Characterization of Two Peptide Hydrolases from Pea Seeds. J. BRUCE CALDWELL AND LINDSAY G. SPARROW
799 Photoreduction of Sulfur Dioxide by Spinach Leaves and Isolated Spinach Chloroplasts. JOHN E. SILVIUS, CHARLES H. BAER, SHERMAN DODRILL, AND HOMER PATRICK
802 Carbohydrate-limited Growth Kinetics of Tobacco (*Nicotiana rustica* L.) Callus. WARREN F. HUNT AND ROBERT S. LOOMIS
806 Enhancement of CO_2 Uptake in *Avena* Coleoptiles by Fusicoccin. KENNETH D. JOHNSON AND DAVID L. RAYLE
812 Effect of Thiamine on Ethanol and Pyruvate Production in *Helminthosporium maydis*. ROBERT C. EVANS AND MICHAEL O. GARRAWAY
817 Additional Evidence for Separable Responses to Auxin in Soybean Hypocotyl. LARRY N. VANDERHOEF, CATHERINE A. STAHL, CINDI A. WILLIAMS, KATHLEEN A. BRINKMANN, AND JOHN C. GREENFIELD
820 Chemotaxis of *Rhizobium spp.* to Plant Root Exudates. WILLIAM W. CURRIER AND GARY A. STROBEL
824 Relation between Paramylum Content and the Length of the Lag Period of Chlorophyll Synthesis during Greening of Dark-grown *Euglena gracilis*. GEORGES FREYSSINET
831 Influence of Culture Conditions on the Length of the Lag Period of Chlorophyll Synthesis in Preilluminated Dark-grown *Euglena*. GEORGES FREYSSINET
836 Involvement of Endogenous Ethylene in the Induction of Color Change in Shamouti Oranges. AKIVA APELBAUM, ELIEZER E. GOLDSCHMIDT, AND SHIMSHON BEN-YEHOSHUA

Number 6. June

839 A New Class of Synthetic Auxin Transport Inhibitors. ELMO M. BEYER, JR., ALEX L. JOHNSON, AND PHILIP B. SWEETSER

842 Calorimetric Studies of the Elongation of *Avena* Coleoptile Segments. HARLAN E. BOGIE, GORDON C. KRESHECK, AND KENNETH H. HARMET

846 Glucolipids of *Zea mays* and *Pisum sativum*. YUKIO MOROHASHI AND ROBERT S. BANDURSKI

850 Auxin Biogenesis. Subcellular Compartmentation of Indoleacetaldehyde Reductases in Cucumber Seedlings. PETER J. BOWER, HUGH M. BROWN, AND WILLIAM K. PURVES

855 Floral Activity in Solutions of Deoxyribonucleic Acid Extracted from Tobacco Stems. WILLIAM L. WARDELL

862 Glutamate Synthetase in Developing Cotyledons of *Pisum sativum*. LEONARD BEEVERS AND RICHARD STOREY

867 Purification and Partial Characterization of a Dipeptidase from Barley. TUOMAS SOPANEN

872 Evidence for Phloem Loading from the Apoplast. Chemical Modification of Membrane Sulfhydryl Groups. ROBERT GIAQUINTA

876 Photosynthetic Carbon Metabolism of a Marine Grass. C. ROY BENEDICT AND JAMES R. SCOTT

881 Distribution of Nitrate-assimilating Enzymes between Mesophyll Protoplasts and Bundle Sheath Cells in Leaves of Three Groups of C_4 Plants. C. K. M. RATHNAM AND GERALD E. EDWARDS

886 Cobalt and Plant Development. Interactions with Ethylene in Hypocotyl Growth. SCOTT GROVER AND WILLIAM K. PURVES

890 Effect of Protein Additives on Acetylene Reduction (Nitrogen Fixation) by *Rhizobium* in the Presence and Absence of Soybean Cells. STEPHEN J. ANDERSON AND DONALD A. PHILLIPS

894 An Improved Cytokinin Bioassay Using Cultured Soybean Hypocotyl Sections. PETER J. MANOS AND JONATHAN GOLDTHWAITE

898 Stomatal Response of Engelmann Spruce to Humidity, Light, and Water Stress. MERRILL R. KAUFMANN

902 Control of Enzyme Activities in Cotton Cotyledons during Maturation and Germination. I. Nitrate Reductase and Isocitrate Lyase. JOHN W. RADIN AND RICHARD N. TRELEASE

906 Purification and Characterization of Phosphoenolpyruvate Carboxylase from Maize Leaves. KOHJI UEDAN AND TATSUO SUGIYAMA

911 Different Mass Transfer Rates of Labeled Sugars and Tritiated Water in Xylem Vessels and Their Dependency on Metabolism. AART J. E. VAN BEL

915 Regulation of Lignin Formation in Reed Canarygrass in Relation to Disease Resistance. CARROLL P. VANCE AND ROBERT T. SHERWOOD

920 Soluble and Cell Wall Peroxidases in Reed Canarygrass in Relation to Disease Resistance and Localized Lignin Formation. CARROLL P. VANCE, JAMES O. ANDERSON, AND ROBERT T. SHERWOOD

923 Aspects of Nitrogen Metabolism in the Rice Seedling. RANJEET S. MARWAHA AND BIENVENIDO O. JULIANO

928 Rhythmic Nitrate Reductase Activity in Leaves of *Capsicum annuum* L. and the Influence of Kinetin. BARRIE T. STEER

933 Starch Degradation in Isolated Spinach Chloroplasts. CAROLYN LEVI AND MARTIN GIBBS

936 Auxin-induced Changes in the Incorporation of ^{3}H-Amino Acids into Soybean Ribosomal Proteins. ROBERT L. TRAVIS AND JOE L. KEY

939 Light-induced De-epoxidation in Lettuce Chloroplasts. VI. De-epoxidation in Grana and in Stoma Lamellae. DOROTHEA SIEFERMANN AND HARRY Y. YAMAMOTO

941 Influence of Antitranspirants on Rapeseed (*Brassica campestris*) Plants under Water-stressed and Nonstressed Conditions. B. B. PATIL AND RAJAT DE

Subject Index

A

Abscisic acid
  changes in *Panicum*, 227
  content in willow xylem sap, 474
  GA_4 metabolism, 699
  in chilled leaves, 115
  inhibition of cottonseed germination, 454
  response of barley aleurone layers to, 175
Abscission, Hg-induced ethylene formation and, 628
Acclimation, cold, chloroplast thylakoids during, 681
Acer, *myo*-inositol metabolism, 241
Acetylene reduction, protein additives, 890
Adenosine monophosphate, cyclic, assay in higher plants, 29
Adenosine triphosphatase, trypsin-induced activity in potato mitochondria, 583
Aegilops, dormancy in, 670
Aeroponic growth of plants, 344
Aging, barley root electropotential, 123
Aging progression, dwarfism and, in bean, 547
Aleurone, barley, response to ABA, 175
Alfalfa
  protein extractants and cold tolerance, 720
  steady state photosynthesis in leaves, 69
Alga
  blue-green, oxygen and hydrogen exchange from, 659
  naturally wall-less, growth and plastid replication, 497
  sulfate utilization, 430
Amino acids
  canaline-urea cycle, growth-inhibiting properties, 493
  ^{3}H-labeled, incorporation of, 936
Amphidinium carterae, peridinin-chlorophyll *a* proteins, 297
Ancymidol, effects on growth, sterols, and gibberellins, 640
Antheridogen specificity, 666
Anthocyanin formation in corn seedlings, 192
Antimycin A, glutamine synthesis and photophosphorylation, 623
Antitranspirants, water stress, 941
Apoplast, phloem loading from, 872
Arabidopsis, gravimorphism, 358
Auxin
  biogenesis, 850
  bound, formation in growing stems, 197
  incorporation of ^{3}H-amino acids, 936
  membrane-bound polysomes in pea, 516
  separable responses to in soybean, 817
Auxin transport inhibitors, new synthetic, 839

B

Bark, stem, dehardening, 710
Barley
  aleurone layers response to ABA, 175
  boron uptake by roots, 353
  dipeptidase, 867
  leaf cell water and enzyme activity, 656
  lysine catabolism, 687
  nitrate absorption
    influence of nitrate reductase activity, 59
    kinetics and energetics, 55
  nitrate reductase activity in seedlings, 519
  nitrate reductase in roots under sterile, low oxygen conditions, 458
  transmembrane electropotential in roots, 123
Bean
  aging progression and dwarfism, 547
  castor
    endoplasmic reticulum in glyoxysome formation, 406
    lipid metabolism, 510
    phosphatidylcholine synthesis in endosperm, 382
    phospholipid synthesis, 218
    RuDP carboxylase development in nonphotosynthetic endosperms, 589
  effects of ancymidol and triarimol, 640
  mung
    assay for malformin growth stimulation, 365
    ethylene and phototropism, 286
    ethylene production, 88
  phototransformable protochlorophyll, 369
Beet, sugar
  effect of powdery mildew on photosynthesis, 486
  effects of sulfur on photosynthesis, 477
Benzyladenine
  effect on *myo*-inositol metabolism in *Acer* cultures, 241
  GA_4 metabolism, 699
Boron uptake by barley roots, 353
Bundle sheath cells in C_4 plants, 881

C

Cabbage, environment and freezing resistance, 553
Calcium, requirement for IAA-induced acidification by coleoptiles, 347
Calcium ion, stimulation of ethylene production by, 88
Callus, tobacco, growth kinetics, 802
Calorimetry of *Avena* coleoptiles, 842
Canaline-urea cycle amino acids, growth-inhibiting properties, 493
Canarygrass, reed, lignin formation, 915, 920
Capsicum annuum, rhythmic nitrate reductase activity, 928
Carbamoyl phosphate synthetase, pea leaf, regulatory properties, 23
Carbohydrates, growth kinetics of tobacco callus, 802
Carbon drainage from tricarboxylic acid cycle, 304
Carbon 13, isotope discrimination by RuDP carboxylase, 580
Carbon dioxide
  fusicoccin-enhanced uptake, 806
  leaf starch and assimilation of, in soybean, 560
  tuberization in potato, 480
Carbon metabolism, photosynthetic, of marine grass, 876
Carboxylase, mesophyll resistance, 465
Carboxylation in tomatoes, genotypic variation, 325
Carotenoid biosynthesis in *Neurospora*, 440
Caryopses, dormancy in, 670
Catalase activity during rice leaf senescence, 315
Catalase inhibitor in corn, 351
Cell culture, turbidimetric measurement of growth in, 460
Chelators, inhibition of photosystem II, 450
Chemotaxis of *Rhizobium spp.*, 820
Chlamydomonas, Chl *a*/*b*-protein complex, 47
Chloramphenicol, photocontrol of reducing power, 594
Chlorophyll, in *Euglena*, 824, 831
Chlorophyll *a*/*b*-protein complex of *Chlamydomonas*, 47
Chloroplast envelopes, properties of, 334
Chloroplasts
  differential localization of fraction I protein between types of, 730
  Euglena, early development, 260, 594
  interactions of phenazine methosulfate and thylakoids, 387
  interactions with mitochondria, 400
  lettuce, light-induced de-epoxidation, 939
  light modulation of enzyme activity, 209
  low water potentials, 704
  microencapsulation of particles, 746
  pea, glutamine synthesis and photophosphorylation, 623
  protein-bound hexosamine, 53
  spinach
    chelator inhibition of photosystem II, 450
    effect of glycidate on photosynthesis in, 237
    effects of pH and oxygen on photosynthetic reactions, 277
    galactolipid depletion, 724
    growth and replication, 41
    photoreduction of sulfur dioxide, 799
    starch degradation, 933
    thylakoids during cold acclimation, 681
    thylakoids during freeze-thaw cycle, 673
  sugar beet
    effect of powdery mildew on photosynthesis, 486
    effects of sulfur on photosynthesis, 477
Chloroplast system, reconstituted, generation of natural oxidant in, 203
Citrus, Hg-induced ethylene and abscission, 628
Cobalt, plant development, 886
Cold
  chloroplast thylakoids during acclimation to, 681
  tolerance, protein extractants, 720
Cold hardiness, mitochondrial swelling and contraction, 469
Coleoptile, oat
  calorimetry, 842
  fusicoccin-enhanced CO_2 uptake, 806
  IAA-induced acidification, 347
Coleus, Hg-induced ethylene and abscission, 628

Corn
anthocyanin formation in seedlings, 192
catalase inhibitor, 351
diquat resistant photosynthesis mutants, 284
electrical resistances of root, 137
glucolipids, 846
hydroxylamine reductase enzymes, 693
K^+ and Cl^- fluxes in roots, 129
K^+ uptake in root, 171
lipid changes in developing proplastids, 789
nitrate reductase in roots and leaves, 572
PEP carboxylase from leaves, 906
plasma membranes from roots, 105
RNA synthesis during germination, 632
root tip removal and Rb absorption, 607
salinity-phosphate interactions, 157
secretion and dictyosomes in roots, 249
zein synthesis, 740
Cotton
ABA inhibition of seed germination, 454
enzyme activities in cotyledons, 902
linolenic acid and chilling resistance, 257
water deficit and ethylene evolution by young bolls, 403
Cotyledons
cotton, enzyme activities, 902
pea
glutamate synthetase in, 862
glycoprotein metabolism, 93
soybean
effect of freezing on phospholipids, 270
IAA synthesis, 437
lipid synthesis and degradation in, 375
triglyceride biosynthesis, 556
Crassulacean acid metabolism plants, NAD-"malic" enzyme in, 310
Crown gall tumor
accumulation of proteinase inhibitor I, 214
cytokinins, 393
radiotracer studies, 415
Cucumber
GA_1 transport and metabolism, 734
IAAld, 850
Cupric ion, stimulation of ethylene production by, 88
α-Cyclopropyl-α- (*p*-methoxyphenyl) -5-pyrimidine methyl alcohol, inhibition of *ent*-kaurene oxidation, 245
Cytochrome *f* in *Lemna* photosynthetic mutant, 577
Cytokinins
activity in willow xylem sap, 474
bioassay of soybean hypocotyl, 894
in maturing olives, 490
in pea root nodules, 602
in tumor tissue, 393
Cytokinin N^6-benzyladenine incorporation into tobacco callus tRNA and rRNA, 15

D

De-epoxidation, light-induced, in lettuce chloroplasts, 939
Dehardening of black locust stem bark, microsomal phospholipid during, 710
Deoxyribonucleic acid
aggregates from short fragments of, 617
floral activity, 855
synthesis in potato, tuber, 568
Desiccation, protein synthesis, 564
2,4-Dichlorophenoxyacetic acid, effect on *myo*-inositol metabolism in *Acer* cultures, 241
Dictyosomes in corn roots, 249
Dinoflagellate, peridinin-chlorophyll *a* proteins, 297
Dipeptidase, barley, 867
Disease resistance, lignin formation in reed canarygrass, 915, 920
Dwarfism, aging progression and, in bean, 547

E

Electron flow, galactolipid depletion, 724
Embryo, pear, isoperoxidase during cold treatment, 1
Endoplasmic reticulum in glyoxysome formation, 406
Endosperm, castor bean
endoplasmic reticulum in glyoxysome formation, 406
lipid metabolism, 510
phosphatidylcholine synthesis, 382
RUDP carboxylase development in, 589
Energy charge in sunflower root, glutamine synthetase regulation by, 339
Enzymes
hydroxylamine reductase, from corn, 693
microsomal, during dehardening, 710
nitrate-assimilating, in C_4 plants, 881
Ethanol, thiamine effect on production of, 812
Ethephon, pigment changes in fig fruits, 504
Ethylene
autoinhibition in fig, 647
biosynthesis in senescent morning-glory flower, 528
color change in orange, 836
evolution and senescence in morning-glory flowers, 523
evolution by young cotton bolls, 403
Hg-induced formation, 628
interactions with cobalt in hypocotyl growth, 886
lettuce seedling growth, 420
mung bean phototropism, 286
production stimulation by Cu^{2+}, Ca^{2+}, and kinetin, 88
sweet potato isoperoxidases, 74
tuberization in potato, 480
wound, biosynthesis in morning-glory flower, 538
Euglena
aliphatic chains of esterified lipids in, 645
early development of chloroplasts, 594
growth conditions and potentiation, 831
paramylum and chlorophyll, 824
SAN 9789 inhibition of carotenoids, 260
Eyespot, *Euglena*, aliphatic chains of esterified lipids in, 645

F

Fern, antheridogen specificity, 666
Ferredoxin-NADP reductase system, photocontrol of reducing power, 594
Ficoll, plasma membranes from corn roots, 105
Fig
autoinhibition of ethylene, 647
Ethephon-induced pigment changes, 504
Flower, morning-glory
biosynthesis of wound ethylene, 538
ethylene evolution and senescence, 523
methionine metabolism and ethylene biosynthesis, 528
Flowering, abnormal, in photosynthetic mutant of *Lemna*, 577
Freeze-thaw cycle, chloroplast thylakoids, 673
Freezing, effect on phospholipids, 270
Freezing resistance, environment and, in cabbage leaves, 553
Fruit
black olive, cytokinins in, 490
fig
autoinhibition of ethylene, 647
Ethephon-induced pigment changes, 504
Fungus, light-stimulated mechanical changes, 456
Fusicoccin, CO_2 uptake in oat coleoptiles, 806

G

Galactolipid fatty acid composition, manipulation with substituted pyridazinones, 38
Galactolipids
effects of depletion, 724
synthesis in *Vicia faba* leaves, 179
Germination, promotion of, 446
Gibberellin A_1, transport and metabolism in cucumber seedlings, 734
Gibberellin A_4, metabolism in lettuce, 699
Gibberellins, effects of ancymidol and triarimol, 640
Glucolipids of corn and peas, 846
D-Glucose, effect on *myo*-inositol metabolism in *Acer* cultures, 241
Glutamate, conversion of 5-oxo-proline to, 85
Glutamate synthetase in pea cotyledons, 862
Glutamine, synthesis of, and photophosphorylation, 623
Glutamine synthetase
and nitrogenase activities in symbiotic association between *Rhizobium japonicum* and *Glycine max*, 542
regulation by energy charge in roots, 339
Glycidate, chloroplast photosynthesis, 237
Glycoprotein metabolism in developing and germinating pea cotyledons, 93
Glyoxysome, endoplasmic reticulum in formation of, 406
Grana, de-epoxidation, 939
Grass, marine, photosynthetic carbon metabolism, 876
Gravimorphism of *Arabidopsis*, 358
Greening, paramylum and chlorophyll during, 824
Growth
effects of ancymidol and triarimol, 640
inhibition by canaline-urea cycle amino acids, 493
in wall-less alga, 497
kinetics of, in tobacco callus, 802
light-stimulated, mechanical changes during, 456
malformin stimulation, 365

H

Heat treatments and lettuce seed germination, 612
Helminthosporium
influence of toxin on K^+ uptake in corn roots, 171
thiamine effects, 812
Hexosamine, protein-bound, distribution in chloroplasts, 53
Host-pathogen interactions, 751, 760, 766, 775
Hydrogen exchange from alga, 659
Hydroperoxide lyase in watermelon seedlings, 780
4-Hydroxycinnamate hydroxylase from sorghum leaves, 320

Hydroxylamine reductase from corn, 693
Hypocotyl
bean, aging progression and dwarfism, 547
cobalt and ethylene, 886
soybean
cytokinin bioassay, 894
separable auxin responses, 817

I

Indoleacetaldehyde reductase, subcellular compartmentation, 850
Indoleacetic acid
acidification by coleoptiles, 347
synthesis in cotyledon callus, 437
Injury
freezing, osmotic shrinkage, 290
rapid metabolic changes in leaf discs, 80
sweet potato isoperoxidases, 74
Myo-Inositol metabolism in *Acer* cultures, 241
Ionic strength, influence on extraction of tobacco polyribosomes, 5
γ-Irradiation, chloroplast growth and replication after, 41
Isocitrate lyase, cotton cotyledons, 902
Isoperoxidase
in cold-treated pear embryo, 1
in sweet potato, injury and ethylene, 74

K

ent-Kaurene, inhibition of oxidation, 245
Kinetin
effects on potassium transport, 230
germination promotion, 446
nonmetabolic catalysis of, 928
rhythmic nitrate reductase activity, 928
stimulation of ethylene production by, 88

L

Leaf
alfalfa, steady state photosynthesis in, 69
barley, cell water and enzyme activity, 656
cabbage, environment and freezing resistance, 553
Capsicum annuum, rhythmic nitrate reductase activity, 928
corn
lipid changes in developing proplastids, 789
nitrate reductase, 572
PEP carboxylase from, 906
salinity-phosphate interactions, 157
pea, carbamoyl phosphate synthetase, 23
quantum yield at low water potentials, 704
rice, oxidative enzymes during senescence, 315
sorghum
effects of water stress on cell ultrastructure, 11
4-hydroxycinnamate hydroxylase from, 320
soybean, starch and CO_2 assimilation, 560
spinach, photoreduction of sulfur dioxide, 799
sugar beet
effect of powdery mildew on photosynthesis, 486
effects of sulfur on photosynthesis, 477
tobacco
isolation of polyribosomes from, 5
rapid metabolic changes after wounding, 80
Xanthium, ABA content, 115
Lemna, photosynthetic mutant, 577
Lettuce
GA_4 metabolism, 699
germination promotion, 446
growth of etiolated seedlings, 420
heat treatments and seed germination, 612
light-induced de-epoxidation in chloroplasts, 939
Light
GA_4 metabolism, 699
red, aging progression and dwarfism in bean, 547
Lignin formation in reed canarygrass, 915, 920
Linolenic acid, chilling resistance, 257
Lipid acylhydrolases, potato, 142
Lipids
esterified, in *Euglena*, 645
metabolism in castor bean endosperm, 510
sequential changes in proplastids, 789
synthesis and degradation in cotyledons, 375
Lipoxygenase in watermelon seedlings, 780
Locust
black, dehardening of stem bark, 710
exudation and potassium transport in roots, 230
Lysine catabolism in barley, 687

M

Malformin, growth stimulation, 365
Mercury, ethylene formation and abscission, 628
Mesophyll protoplasts in C_4 plants, 881
Mesophyll resistance, carboxylase activity, 465
Methionine metabolism in senescent morning-glory flower, 528
N-Methylphenazinium methyl sulfate interactions with chloroplast thylakoids, 387
Microsome, black locust bark, phospholipid and enzymes during dehardening, 710
Mildew, powdery, effect on photosynthesis, 486
Mitochondria
from wheat and rye seedlings, swelling and contractions, 469
interactions with chloroplasts, 400
potato, ATPase activity, 583
Morning-glory
biosynthesis of wound ethylene in flower, 538
ethylene evolution and senescence in flowers, 523
methionine metabolism and ethylene biosynthesis in flower, 528
Moss
desiccation and protein synthesis, 564
mitochondria and chloroplast interactions, 400

N

Neurospora, carotenoid biosynthesis, 440
Nitrate
absorption by barley
influence of nitrate reductase activity, 59
kinetics and energetics, 55
nitrate reductase activity in barley seedlings, 519
Nitrate reductase
activity in barley seedlings, 519
cotton cotyledons, 902
in barley roots under sterile, low oxygen conditions, 458
in corn roots and leaves, 572
influence of activity of on nitrate absorption by barley, 59
rhythmic activity in *Capsicum annuum* leaves, 928
Nitrite reductase, hydroxylamine reductase from corn and, 693
Nitrogen, metabolism in rice seedling, 923
Nitrogenase and glutamine synthetase activities in symbiotic association between *Rhizobium japonicum* and *glycine max*, 542

O

Oat
calorimetry of coleoptiles, 842
fusicoccin-enhanced uptake of CO_2, 806
IAA-induced acidification by coleoptiles, 347
Olive, black, cytokinins in maturing fruits, 490
Orange, ethylene in color change, 836
Orchid, cyclic photophosphorylation in, 716
Osmotic shrinkage in freezing injury, 290
5-Oxoproline conversion to glutamate, 85
Oxygen
exchange from alga, 659
photosynthetic reactions of intact chloroplasts, 277

P

Panicum, ABA changes, 227
Paramylum in *Euglena*, 824
Pea
auxins and membrane-bound polysomes, 516
carbamoyl phosphate synthetase, 23
cytokinins in root nodules, 602
glucolipids, 846
glutamate synthetase in cotyledons, 862
glutamine synthesis and photophosphorylation, 623
glycoprotein metabolism in cotyledons, 93
glycosylated seryl residues in wall protein, 224
peptide hydrolases from seeds, 795
Pear, isoperoxidase in cold-treated embryo, 1
Peptide hydrolases from pea seeds, 795
Peroxidase
activity during rice leaf senescence, 315
soluble and cell wall, in reed canarygrass, 920
Peroxide in poplar tree, 308
pH
influence on extraction of tobacco polyribosomes, 5
photosynthetic reactions of intact chloroplasts, 277
Phenazine methosulfate, interaction with chloroplast thylakoids, 387
Phloem loading from apoplast, 872
Phosphatidylcholine synthesis in castor bean endosperm, 382
Phosphoenolpyruvate carboxylase from corn leaves, 906
Phospholipase, A type, potato, 148
Phospholipids
effect of freezing, 270
microsomal, during dehardening, 710
synthesis and exchange in castor bean endosperm, 218
triglyceride biosynthesis by soybean cotyledons, 556
Phosphorylation, galactolipid depletion, 724

Photophosphorylation
cyclic, in orchid, 716
glutamine synthesis, 623
Photosynthesis
effect of powdery mildew, 486
effects of sulfur, 477
steady state, in alfalfa leaves, 69
Photosystem II, chelator inhibition of, 450
Phototropism in mung bean, ethylene, 286
Phytochrome
membrane permeability to tritiated water, 185
stability *in vitro*, 188
Phytophthora megasperma, host-pathogen interactions, 751, 760, 766, 775
Plastoquinone in *Lemna* photosynthetic mutant, 577
Polyphenoloxidase activity during rice leaf senescence, 315
Polyribosomes
isolation from tobacco leaves, 5
pea, auxins, 516
Poplar, peroxide in, 308
Potassium
influence of *Helminthosporium* toxin on uptake in corn roots, 171
transport in locust roots, 230
Potato
accumulation of proteinase inhibitor I in crown gall tissues, 214
A type phospholipase, 148
C_2H_4, CO_2, and tuberization, 480
DNA synthesis in tuber, 568
lipid acylhydrolases, 142
pyrophosphorylases in, 63
trypsin-induced ATPase activity in mitochondria, 583
Potentiation in *Euglena*, 831
Proplastids, corn, lipid changes in developing, 789
Protein additives, effect on acetylene reduction, 890
Proteinase inhibitor I, accumulation in crown gall tissues, 214
Protein extractants cold tolerance, 720
Proteins
fraction I, differential localization, 730
peridinin-chlorophyll *a*, 297
soybean ribosomal, incorporation of ^{3}H-amino acids into, 936
storage, synthesis in corn, 740
synthesis
desiccation, 564
DNA synthesis in potato tuber, 568
Protochlorophyll, phototransformable, 369
Protoplasts, tobacco, nutrient medium for, 424
Pyridazinones, substituted, manipulation of galactolipid fatty acid composition with, 38
Pyrophosphorylases in potato, 63
Pyruvate, thiamine effect on production, 812

Q

Quantum yield at low water potentials, 704

R

Radiotracer study, crown gall, 415
Rapeseed, antitranspirants, 941
Reed canarygrass, lignin formation, 915, 920
Rhizobiuum
chemotaxis, 820
effect on protein additives on acetylene reduction, 894
glutamine synthetase and nitrogenase activities in symbiotic association between soybean and, 542
nitrogenase activation in culture, 651
Ribonucleic acid
cytokinin incorporation in tobacco, 15
cytoplasmic, during dehydration, 564
ribosomal, molecular integrity, 410
synthesis during corn germination, 632
Ribulose 1,5-diphosphate carboxylase
development in nonphotosynthetic endosperms, 589
isotope discrimination by, 580
Rice
nitrogen metabolism in seedling, 923
oxidative enzymes during leaf senescence, 315
Root
barley
boron uptake, 353
nitrate reductase in, under sterile, low oxygen conditions, 458
transmembrane electropotential, 123
chemotaxis of *Rhizobium spp.*, 820
corn
electrical resistances, 137
K^+ and Cl^- fluxes, 129
K^+ uptake, 171
nitrate reductase, 572
plasma membrane isolation, 105
removal of tip of, and Rb absorption, 607
secretion and dictyosomes, 249
locust, exudation and potassium transport, 230
nonlinear water flow, 738
pea cytokinins in nodules, 602
soybean, rhizobial nitrogenase activation, 651
sunflower, glutamine synthetase regulation by energy charge, 339
Tamarix, salinity and respiration, 167
Rose, Paul's Scarlet, drainage from tricarboxylic acid cycle, 304
Rubidium, root tip removal and absorption of, 607
Rye, swelling and contraction of mitochondria from seedlings, 469

S

Salinity
genotypic responses to, 162
phosphate interactions, 157
SAN 9789, inhibition of *Euglena* carotenoids, 260
Scutellum, corn, hydroxylamine reductase from 693
Seasonal variations in willow hormone content, 474
Seed
cotton, ABA inhibition of germination, 454
lettuce
GA_4 metabolism, 699
germination promotion, 446
heat treatments and germination of, 612
pea, peptide hydrolases, 795
soybean, respiratory transition during germination, 274
water uptake and diffusivity, 153
Seedling
barley, nitrate reductase activity, 519
bean, phototransformable protochlorophyll, 369
corn, anthocyanin formation, 192
cotton, linolenic acid and chilling resistance, 257
cucumber
GA_1 transport and metabolism, 734
IAAld, 850
lettuce
GA_4 metabolism, 699
growth, 420
rice, nitrogen metabolism, 923
watermelon, lipoxygenase and hydroperoxide lyase, 780
wheat and rye, swelling and contraction of mitochondria from, 469
Senescence, rice leaf, oxidative enzymes during, 315
Seryl residues, glycosylated, in wall protein, 224
Sorghum
effects of water stress on leaf cell ultrastructure, 11
4-hydroxycinnamate hydroxylase from leaves, 320
Soybean
cytokinin bioassay, 894
effect of freezing on phospholipids, 270
glutamine synthetase and nitrogenase activities in symbiotic association between *Rhizobium japonicum* and, 542
host-pathogen interactions, 751, 760, 766, 775
IAA synthesis in cotyledon callus, 437
incorporation of ^{3}H-amino acids, 936
leaf starch and CO_2 assimilation, 560
lipid synthesis and degradation in cotyledons, 375
protein effects on acetylene reduction, 894
respiratory transition during seed germination, 274
rhizobial nitrogenase activation in culture, 651
RuDP carboxylase, 580
separable auxin responses, 817
triglyceride biosynthesis, 556
Spinach
chelator inhibition of photosystem II, 450
chloroplast growth and replication, 41
chloroplast thylakoids, during cold acclimation, 681
effects of galactolipid depletion, 724
glycidate and chloroplast photosynthesis, 237
photoreduction of sulfur dioxide, 799
starch degradation in chloroplasts, 933
Spruce, Engelmann, stomatal response, 898
Starch
concentration in soybean leaf, 560
degradation in spinach chloroplasts, 933
Stem
bound auxin formation, 197
pea, glycosylated seryl residues, 224
phototropism of mung bean, 286
tobacco, floral activity in DNA, 855
Sterols, effects of ancymidol and triarimol, 640
Stomata
response of Engelmann spruce, 898
sensitivity to CO_2 in chilled leaves, 115
Stroma lamellae, de-epoxidation, 939
Sucrose density gradient centrifugation, isolation of plasma membranes from corn roots by, 105
Sugar, xylem transfer, 911
Sulfate utilization by algae, 430
Sulfhydryl groups, membrane, chemical modification of, 872

Sulfur, effects on photosynthesis, 477
Sulfur dioxide, photoreduction by spinach leaves and chloroplasts, 799
Sunflower, glutamine synthetase regulation by energy charge, 339
Sweet potato, isoperoxidases in injury and ethylene, 74

T

Tamarix, salinity and respiration of roots, 167
Temperature, RuDP carboxylase, 580
Thiamine effects in *Helminthosporium maydis*, 812
Thylakoids, chloroplast, 387
  during cold acclimation, 681
  during freeze-thaw cycle, 673
Tobacco
  accumulation of proteinase inhibitor I in crown gall tissues, 214
  callus growth kinetics, 802
  cytokinin incorporation, 15
  floral activity in DNA, 855
  isolation of polyribosomes from leaves, 5
  nutrient medium for protoplasts, 424
  rapid metabolic changes in wounding response of leaf discs, 80
Tomato
  accumulation of proteinase inhibitor I in crown gall tissues, 214
  genotypic variation in carboxylation, 325
  salt-sensitive and -tolerant genotypes, 162
Triarimol, effects on growth, sterols, and gibberellins, 640
Tricarboxylic acid cycle, carbon drainage from, 304
Triglyceride biosynthesis by soybean cotyledons, 556
Trypsin, ATPase activity, 583
L-Tryptophan, enzymes of biosynthesis, 101
Tuber, potato, DNA synthesis, 568
Tuberization, C_2H_4 and CO_2, 480
Tumor, crown gall
  cytokinins, 393
  radiotracer studies, 415

V

Vicia faba, galactolipid synthesis in leaves, 179

W

Water, tritiated, xylem transfer, 911
Water deficit, ethylene evolution by young cotton bolls, 403
Water flow, nonlinear root, 738
Watermelon, lipoxygenase and hydroperoxide lyase in seedlings, 780
Water potentials, low, chloroplast response, 704
Water stress
  antitranspirants, 941
  effects on ultrastructure of sorghum leaf cells, 11
  mesophyll resistance and carboxylase activity, 465
  stomatal response of Engelmann spruce, 898
Wheat, swelling and contraction of mitochondria from seedlings, 469
Willow, seasonal variation in hormone content, 474

X

Xanthium, ABA in chilled leaves, 115
Xylem
  transfer of sugars and tritiated water, 911
  willow, ABA content and cytokinin activity, 474

Z

Zein synthesis in corn, 740

Volume Contents

Number 1. July

1 Partial Characterization of a Protease Inhibitor Which Inhibits the Major Endopeptidase Present in the Cotyledons of Mung Beans. BRUNO BAUMGARTNER AND MAARTEN J. CHRISPEELS

7 Variation in Germination and Amino Acid Leakage of Seeds with Temperature Related to Membrane Phase Change. STERLING B. HENDRICKS AND RAY B. TAYLORSON

12 Influence of Temperature on Nitrate Metabolism and Leaf Expansion in Soybean (*Glycine max*. L. Merr.) Seedlings. ANTONIO C. MAGALHÃES, DOYLE B. PETERS, AND RICHARD H. HAGEMAN

17 Automatic Monitoring of a Circadian Rhythm of Change in Light Transmittance in *Ulva*. STEVEN J. BRITZ, J. PFAU, W. NULTSCH, AND WINSLOW R. BRIGGS

22 Circadian Rhythms of Chloroplast Orientation and Photosynthetic Capacity in *Ulva*. STEVEN J. BRITZ AND WINSLOW R. BRIGGS

28 Carbohydrate and Enzymic Characterization of a High Sucrose Sugary Inbred Line of Sweet Corn. JORGE W. GONZALES, ASHBY M. RHODES, AND DAVID B. DICKINSON

33 Regulation of Potassium Absorption in Barley Roots. An Allosteric Model. ANTHONY D. M. GLASS

38 Characteristics of External NADH Oxidation by Beetroot Mitochondria. DAVID A. DAY, JOHN R. RAYNER, AND JOSEPH T. WISKICH

43 Enzymic Nature of the Protein Moiety of Protochlorophyllide Holochrome. YIANNIS MANETAS AND GEORGE A. AKOYUNOGLOU

47 Effects of Cyanide and Ethylene on the Respiration of Cyanide-sensitive and Cyanide-resistant Plant Tissues. THEOPHANES SOLOMOS AND GEORGE G. LATIES

51 Induction of Furano-terpene Production and Formation of the Enzyme System from Mevalonate to Isopentenyl Pyrophosphate in Sweet Potato Root Tissue Injured by *Ceratocystis fimbriata* and by Toxic Chemicals. KAZUKO ŌBA, HARUKI TATEMATSU, KO YAMASHITA, AND IKUZO URITANI

57 Specificity for Nicotinamide Adenine Dinucleotide and Nicotinamide Adenine Dinucleotide Phosphate of Nitrate Reductase from the Salt-tolerant Alga *Dunaliella parva*. YAIR M. HEIMER

60 Esters of Indole-3-Acetic Acid from *Avena* Seeds. FRANK W. PERCIVAL AND ROBERT S. BANDURSKI

68 Endogenous Gibberellins of Pine Pollen. III. Conversion of 1,2-[^{3}H]GA_4 to Gibberellins A_1 and A_{34} in Germinating Pollen of *Pinus attenuata* Lemm. ANIELA KAMIENSKA, RICHARD C. DURLEY, AND RICHARD P. PHARIS

71 *In Vitro* Iodination of Plant Ribonucleic Acids. ROBERT R. MEEKER, JAMES R. THOMAS, AND KRISHNA K. TEWARI

77 Metabolism of Indole-3-Acetic Acid. II. Oxindole Pathway in *Parthenocissus tricuspidata* Crown-Gall Tissue Cultures. ROBERT H. HAMILTON, HAROLD E. MEYER, ROBERT E. BURKE, CHAO S. FEUNG, AND RALPH O. MUMMA

82 Mechanism of Plant Growth Stimulation by Naphthenic Acid. II. Enzymes of CO_2 Fixation, CO_2 Compensation Point, Bean Embryo Respiration. D. JAMES WORT

87 Fractionation and Analysis of Polypeptides of *Euglena gracilis* Chloroplasts. AUREA C. VASCONCELOS, LETICIA R. MENDIOLA-MORGENTHALER, GARY L. FLOYD, AND JEFFREY L. SALISBURY

91 Physiological Characteristics of Photosynthesis and Respiration in Stems of *Populus tremuloides* Michx. KNOWLTON C. FOOTE AND MICHAIL SCHAEDLE

95 *In Vitro* Studies of Nitrate Reductase Activity in Cotton Cotyledons. Effects of Dowex 1-Cl and BSA. ALBERT C. PURVIS, CHARLES R. TISCHLER, AND ROGER C. FITES

100 Attempts to Detect *Agrobacterium tumefaciens* DNA in Crown-Gall Tumor Tissue. DONALD J. MERLO AND JOHN D. KEMP

107 Developmental Effects of Zeatin, Ribosyl-Zeatin, and *Agrobacterium tumefaciens* B_6 on Certain Mosses. LURETTA D. SPIESS

110 Organelle-specific Isozymes of Aspartate-α-Ketoglutarate Transaminase in Spinach Leaves. ANTHONY H. C. HUANG, KITTY D. F. LIU, AND RICHARD J. YOULE

114 Inhibition of Ethylene Production by Cobaltous Ion. OI-LIM LAU AND SHANG F. YANG

i Instructions for Contributors

Number 2. August

119 *Azolla-Anabaena azollae* Relationship. IV. Photosynthetically Driven, Nitrogenase-catalyzed H_2 Production. GERALD A. PETERS, WILLIAM R. EVANS, AND ROBERT E. TOIA, JR.

127 Limitation on the Use of the Horizontal Clinostat as a Gravity Compensator. ALLAN H. BROWN, A. O. DAHL, AND D. K. CHAPMAN

131 Analysis of Native Gibberellins in the Internode, Nodes, Leaves, and Inflorescence of Developing *Avena* Plants. PETER B. KAUFMAN, NAJATI S. GHOSHEH, LINDA NAKOSTEEN, RICHARD P. PHARIS, RICHARD C. DURLEY, AND WILLIAM MORF

135 Light Modulation of Glucose-6-Phosphate Dehydrogenase. Partial Characterization of the Light Inactivation System and Its Effects on the Properties of the Chloroplastic and Cytoplasmic Forms of the Enzyme. LOUISE E. ANDERSON AND JEFFREY X. DUGGAN

140 Ribosyl-*cis*-zeatin in a Leucyl Transfer RNA Species from Peas. JOHN W. EINSET, SANTHANAM SWAMINATHAN, AND FOLKE SKOOG
143 Variables Affecting the CO_2 Compensation Point. E. WAYNE SMITH, N. E. TOLBERT, AND HAN SAN KU
147 Control of Changes in Mitochondrial Activities during Aging of Potato Slices. PIERRE DIZENGREMEL AND CLAUDE LANCE
152 Ammonium Influence on the Growth and Nitrate Reductase Activity of Paul's Scarlet Rose Suspension Cultures. BIBEKANANDA MOHANTY AND JOHN S. FLETCHER
156 Stimulation of Carbon Dioxide Fixation in Isolated Pea Chloroplasts by Catalytic Amounts of Adenine Nucleotides. SIMON P. ROBINSON AND JOSEPH T. WISKICH
163 Ethylene Formation in Sugar Beet Leaves. Evidence for the Involvement of 3-Hydroxytyramine and Phenoloxidase after Wounding. ERICH F. ELSTNER, JÖRG R. KONZE, BRUCE R. SELMAN, AND CLAUS STOFFER
169 Abscisic Acid Content, Transpiration, and Stomatal Conductance As Related to Leaf Age in Plants of *Xanthium strumarium* L. KLAUS RASCHKE AND JAN A. D. ZEEVAART
175 Abscisic Acid Content of Senescing Petals on Cut Rose Flowers As Affected by Sucrose and Water Stress. AMIHUD BOROHOV, TSIPORA TIROSH, AND ABRAHAM H. HALEVY
179 Enzyme Levels in Relation to Obligate Phototrophy in *Chlamydobotrys*. MICHAEL J. MERRETT
182 Effects of Inorganic Salts on Tissue Permeability. B. W. POOVAIAH AND A. CARL LEOPOLD
186 Photosynthetic Carbon Metabolism in the Palisade Parenchyma and Spongy Parenchyma of *Vicia faba* L. WILLIAM H. OUTLAW, JR., CHERI L. SCHMUCK, AND N. E. TOLBERT
190 Potassium-linked Chloride Fluxes during Rhythmic Leaf Movement of *Albizzia julibrissin*. MARTIN SCHREMPF, RUTH L. SATTER, AND ARTHUR W. GALSTON
193 Uptake and Metabolism of D-Glucose by *Neocosmospora vasinfecta* E. F. Smith. KENNETH BUDD
199 Intracellular Localization of Glycolate Dehydrogenase in a Blue-Green Alga. BERNARD GRODZINSKI AND BRIAN COLMAN
203 Rapid Auxin-induced Decrease in Free Space pH and Its Relationship to Auxin-induced Growth in Maize and Pea. MARK JACOBS AND PETER M. RAY
210 Kinetics of Hormone-induced H^+ Excretion. ROBERT E. CLELAND
214 Photocontrol of Anthocyanin Synthesis. V. Further Evidence against the Involvement of Photosynthesis in High Irradiance Reaction Anthocyanin Synthesis of Young Seedlings. ALBERTO L. MANCINELLI, CHIA-PING H. YANG, ISAAC RABINO, AND KONRAD M. KUZMANOFF
218 Photosynthetic Rates of Sun *versus* Shade Leaves of *Hyptis emoryi* Torr. PARK S. NOBEL
224 Cell Wall Assembly in *Fucus* Zygotes. I. Characterization of the Polysaccharide Components. RALPH S. QUATRANO AND PATRICIA T. STEVENS
232 Effects of Inhibitors of RNA and Protein Synthesis on Aspartate Transcarbamylase Activity in Etiolated Plant Tissue. LOWELL B. JOHNSON, CHARLES L. NIBLETT, AND RICHARD F. LEE
237 Metabolism As a Function of Water Potential in Air-Dry Seeds of Charlock (*Sinapis arvensis* L.). MIRIAM EDWARDS
240 Effect of Cyanide on the Plasmalemma Potential of *Mnium*. ELKE FISCHER, ULRICH LÜTTGE, AND NOE HIGINBOTHAM

Number 3. September

243 Osmotic Factors of Dehardening in *Cornus florida* L. JERRY M. WILLIAMS AND ROBERT J. WILLIAMS
248 Utilization of Selenocysteine by a Cysteinyl-tRNA Synthetase from *Phaseolus aureus*. ALEX SHRIFT, DANIEL BECHARD, CRAIG HARCUP, AND LESLIE FOWDEN
253 Simple Photometric Auxanometers of High Sensitivity. FERGUS D. H. MACDOWALL AND J. CLAUDE SIROIS
257 Development of Photosystem II Complex during Greening of *Chlamydomonas reinhardi* y-1. DAVID CAHEN, SHMUEL MALKIN, SUSANA SHOCHAT, AND ITZHAK OHAD
268 A Potent Inhibitor of Ethylene Action in Plants. ELMO M. BEYER, JR.
272 Affinity Chromatography of the Major Seed Protein of the Bean (*Phaseolus vulgaris* L.). DANIEL R. STOCKMAN, TIMOTHY C. HALL, AND DALE S. RYAN
276 Cell Potentials, Cell Resistance and Proton Fluxes in Corn Root Tissue. Effects of Dithioerythritol. WILLY LIN AND JOHN B. HANSON
283 An NADP-dependent Glutamate Dehydrogenase in Chloroplasts from the Marine Green Alga *Caulerpa simpliciuscula*. KENWYN R. GAYLER AND WAYNE R. MORGAN
288 Equilibration of Label in Malate during Dark Fixation of CO_2 in *Kalanchoë fedtschenkoi*. PETER DITTRICH
292 NADH- and NAD(P)H-Nitrate Reductases in Rice Seedlings. TEH-CHIEN SHEN, EDWARD A. FUNKHOUSER, AND MIGUEL G. GUERRERO
295 *In Vitro* Activation of a Galactosyl Transferase Involved in the Osmotic Regulation of *Ochromonas*. HEINRICH KAUSS AND HARTMUT QUADER
299 Indole-3-acetic Acid in Douglas Fir. Analysis by Gas-Liquid Chromatography and Mass Spectrometry. DAVID R. DEYOE AND JOE B. ZAERR
304 Characterization of Passive Ion Transport in Plasma Membrane Vesicles of Oat Roots. HEVEN SZE AND THOMAS K. HODGES
309 Isolation of Intact Chloroplasts and Other Cell Organelles from Spinach Leaf Protoplasts. MIKIO NISHIMURA, DOUGLAS GRAHAM, AND TAKASHI AKAZAWA
315 Cytochemical Localization of Glycolate Dehydrogenase in Mitochondria of *Chlamydomonas*. BELINDA B. BEEZLEY, PETER J. GRUBER, AND SUE ELLEN FREDERICK

320 Possible Interference by an Acid-stable Enzyme during the Extraction of Nucleoside Di- and Triphosphates from Higher Plant Tissues. HIROSHI IKUMA AND RICHARD M. TETLEY
324 Association of Latent Cellulase Activity with Plasma Membranes from Kidney Bean Abscission Zones. DON E. KOEHLER, ROBERT T. LEONARD, WILLIAM J. VANDERWOUDE, ARTHUR E. LINKINS, AND LOWELL N. LEWIS
331 Cation-stimulated Adenosine Triphosphatase Activity and Cation Transport in Corn Roots. ROBERT T. LEONARD AND CHARLES W. HOTCHKISS
336 Photoreduction of O_2 Primes and Replaces CO_2 Assimilation. RICHARD J. RADMER AND BESSEL KOK
341 Photosynthesis in Trees. Organization of Chlorophyll and Photosynthetic Unit Size in Isolated Gymnosperm Chloroplasts. RANDALL S. ALBERTE, PETER R. MCCLURE, AND J. PHILIP THORNBER
345 Comparative Studies of the Thylakoid Proteins of Mesophyll and Bundle Sheath Plastids of *Zea mays*. STEFAN J. KIRCHANSKI AND RODERIC B. PARK
350 Nitrogen Metabolism in Soybean Tissue Culture. I. Assimilation of Urea. JOSEPH CARMINE POLACCO
358 Characterization of Sulfate Transport in Cultured Tobacco Cells. IVAN K. SMITH
363 Abscisic Acid Levels in Soybean Reproductive Structures during Development. BRUNO QUEBEDEAUX, PHILIP B. SWEETSER, AND JOHN C. ROWELL
367 Carbon Isotope Ratios in Crassulacean Acid Metabolism Plants. Seasonal Patterns from Plants in Natural Stands. STAN R. SZAREK AND JOHN H. TROUGHTON
371 Correlation of Absorbance Changes and Thylakoid Fusion with the Induction of Oxygen Evolution in Bean Leaves Greened by Brief Flashes. RETO J. STRASSER AND WARREN L. BUTLER
377 Ethylene-induced Formation of ABA in Citrus Peel as Related to Chloroplast Transformations. HANANYA E. BRISKER, ELIEZER E. GOLDSCHMIDT, AND RAPHAEL GOREN
380 Production of Cell Wall Hydrolyzing Enzymes by Barley Aleurone Layers in Response to Gibberellic Acid. LINCOLN TAIZ AND WILLIAM A. HONIGMAN
387 Metabolism of [^{3}H]Gibberellin A_{20} in Light- and Dark-grown Tobacco Callus Cultures. BARBARA LANCE, RICHARD C. DURLEY, DAVID M. REID, TREVOR A. THORPE, AND RICHARD P. PHARIS
393 Purification and Characterization of Glucose Dehydrogenase from a Heterotrophically Grown Blue-Green Alga. WARREN M. PULICH, CHASE VAN BAALEN, JANET L. GIBSON, AND F. ROBERT TABITA
398 Effect of Water Stress on Proline Synthesis from Radioactive Precursors. SAMUEL F. BOGGESS, CECIL R. STEWART, DON ASPINALL, AND LESLIE G. PALEG
402 Two Elongation Responses to Auxin Respond Differently to Protein Synthesis Inhibition. LARRY N. VANDERHOEF, CATHERINE A. STAHL, AND TSE-YUAN SHEN LU
405 Metabolism of Poly(A) in Plant Cells. Discrete Classes Associated with Free and Membrane-bound Polysomes. DESH PAL S. VERMA AND GORDON A. MACLACHLAN
411 Synthesis of Suberin during Wound-healing in Jade Leaves, Tomato Fruit, and Bean Pods. BILL BRYAN DEAN AND P. E. KOLATTUKUDY
417 Circadian Rhythmicity in Excised *Samanea* Pulvini. I. Sucrose-White Light Interactions. ESTHER SIMON, RUTH L. SATTER, AND ARTHUR W. GALSTON
421 Circadian Rhythmicity in Excised *Samanae* Pulvini. II. Resetting the Clock by Phytochrome Conversion. ESTHER SIMON, RUTH L. SATTER, AND ARTHUR W. GALSTON
426 Citric Acid Cycle Activity in Mitochondria Isolated from Mung Bean Hypocotyls. EMMA J. BOWMAN, HIROSHI IKUMA, AND HOWARD J. STEIN
433 Regulation of Malate Oxidation in Isolated Mung Bean Mitochondria. I. Effects of Oxaloacetate, Pyruvate, and Thiamine Pyrophosphate. EMMA J. BOWMAN AND HIROSHI IKUMA
438 Regulation of Malate Oxidation in Isolated Mung Bean Mitochondria. II. Role of Adenylates. EMMA J. BOWMAN AND HIROSHI IKUMA

Number 4. October

447 Microbody Malate Dehydrogenase Isozyme in Cotyledons of *Cucumis sativus* L. during Development. IRENE M. WAINWRIGHT AND IRWIN P. TING

453 Purification and Characterization of DNA-dependent RNA Polymerases from Cauliflower Nuclei. TOM J. GUILFOYLE

459 Structure and Some Properties of Soluble 1,3-β-Glucan Isolated from the Green Alga *Caulerpa simpliciuscula*. RUSSELL J. HOWARD, SIMON W. WRIGHT, AND BRUCE R. GRANT

464 Potato Tuber Callus. Validation as a Biochemical Tool. ROY SHAW, JERRY L. VARNS, KARON A. MILLER, AND EUGENE A. TALLEY

468 Changes in Anthocyanin and Phenolics Content of Grapevine Leaf and Fruit Tissues Treated with Sucrose, Nitrate, and Abscisic Acid. ANDREW PIRIE AND MICHAEL G. MULLINS

473 Properties of the System for the Mixed Function Oxidation of Kaurene and Kaurene Derivatives in Microsomes of the Immature Seed of *Marah macrocarpus*. Cofactor Requirements. EDNA P. HASSON AND CHARLES A. WEST

479 Properties of the System for the Mixed Function Oxidation of Kaurene and Kaurene Derivatives in Microsomes of the Immature Seed of *Marah macrocarpus*. Electron Transfer Components. EDNA P. HASSON AND CHARLES A. WEST

485 Distribution of Cellular Carbohydrates during Development of the Mycelium and Fruitbodies of *Flammulina velutipes*. YUTAKA KITAMOTO AND HANS E. GRUEN

492 Production of Guard Cell Protoplasts from Onion and Tobacco. EDUARDO ZEIGER AND PETER K. HEPLER

499 Nitrate Reductase Activity in Maize (*Zea mays* L.) Leaves. I. Regulation by Nitrate Flux. DALE L. SHANER AND JOHN S. BOYER

505 Nitrate Reductase Activity in Maize (*Zea mays* L.) Leaves. II. Regulation by Nitrate Flux at Low Leaf Water Potential. DALE L. SHANER AND JOHN S. BOYER

510 Nitrogen Metabolism in Plant Cell Suspension Cultures. II. Role of Organic Acids during Growth on Ammonia. JOSEF BEHREND AND RICHARD I. MATELES

513 Failure of Ethylene to Change the Distribution of Indoleacetic Acid in the Petiole of *Coleus blumei* X *frederici* during Epinasty. JOHN H. PALMER

516 Purification and Properties of Two Proteolytic Enzymes with Carboxypeptidase Activity in Germinated Wheat. KEN R. PRESTON AND JAMES E. KRUGER

521 Respiratory Chain of Plant Mitochondria. XVIII. Point of Interaction of the Alternate Oxidase with the Respiratory Chain. BAYARD T. STOREY

526 Development of the Primary Photochemical Apparatus of Photosynthesis during Greening of Etiolated Bean Leaves. NEIL R. BAKER AND WARREN L. BUTLER

530 Lettuce Seed Germination. Modulation of Pregermination Protein Synthesis by Gibberellic Acid, Abscisic Acid, and Cytokinin. DAVID W. FOUNTAIN AND J. DEREK BEWLEY

537 Water Potential and Stomatal Resistance of Sunflower and Soybean Subjected to Water Stress during Various Growth Stages. NASSER SIONIT AND PAUL J. KRAMER

541 Annual Variation in the Sterol Content of *Digitalis purpurea* L. Seedlings. MYRA K. JACOBSOHN AND GERT M. JACOBSOHN

544 Ultrastructural Alteration of Plant Plasma Membranes Induced by Auxin and Calcium Ions. D. JAMES MORRÉ AND CHARLES E. BRACKER

548 Evidence for an Increase in Microviscosity of Plasma Membranes from Soybean Hypocotyls Induced by the Plant Hormone, Indole-3-Acetic Acid. SAM L. HELGERSON, WILLIAM A. CRAMER, AND D. JAMES MORRÉ

552 Differential Oxygen Response of Photosynthesis in Soybean and *Panicum milioides*. ROBERT W. KECK AND WILLIAM L. OGREN

556 Concentration-dependent Unloading as a Necessary Assumption for a Closed Form Mathematical Model of Osmotically Driven Pressure Flow in Phloem. JOHN D. GOESCHL, C. E. MAGNUSON, DON W. DEMICHELE, AND PETER J. H. SHARPE

563 Photosynthesis, Dark Respiration, and Growth of *Rumex patientia* L. Exposed to Ultraviolet Irradiance (288 to 315 Nanometers) Simulating a Reduced Atmospheric Ozone Column. WILLIAM B. SISSON AND MARTYN M. CALDWELL

569 Effect of Benzyladenine on Some Enzymes of Mitochondria and Microbodies in Excised Sunflower Cotyledons. ORIETTA SERVETTAZ, FABIO CORTESI, AND CLAUDIO P. LONGO

573 Photorespiration in C_3 and C_4 Plant Tissue Cultures. Significance of Kranz Anatomy to Low Photorespiration in C_4 Plants. ROBERT A. KENNEDY

576 Water Relations and Photosynthesis of a Desert CAM Plant, *Agave deserti*. PARK S. NOBEL

583 Comparison of *in Vivo* and *in Vitro* Assays of Nitrate Reductase in Wheat (*Triticum aestivum* L.) Seedlings. NICHOLA BRUNETTI AND RICHARD H. HAGEMAN

588 Effect of Light and Glucose on the Induction of Nitrate Reductase and on the Distribution of Nitrate in Etiolated Barley Leaves. MUHAMMAD ASLAM, ANN OAKS, AND RAY C. HUFFAKER

592 Effects of Chloramphenicol on the Circadian Rhythm of *Neurospora crassa*. JOHN G. FRELINGER, HARVEY MOTULSKY, AND DOW O. WOODWARD

595 Lipid and Fatty Acid Composition of Chloroplast Envelope Membranes from Species with Differing Net Photosynthesis. RAYMOND P. POINCELOT

599 A New Sensitive Root Auxanometer. Preliminary Studies of the Interaction of Auxin and Acid pH in the Regulation of Intact Root Elongation. MICHAEL L. EVANS

602 Corrections

Number 5. November

603 Characterization of Phosphoenolpyruvate Carboxykinase from *Panicum maximum*. THOMAS B. RAY AND CLANTON C. BLACK, JR.
608 Turgor Pressure Regulation in *Valonia utricularis*. Effect of Cell Wall Elasticity and Auxin. ULRICH ZIMMERMANN, ERNST STEUDLE, AND PETER I. LELKES
614 Selective Modulation of RNA Polymerase I Activity during Growth Transitions in the Soybean Seedling. CHU-YUNG LIN, YIH-MING CHEN, TOM J. GUILFOYLE, AND JOE L. KEY
618 Starch Degradation in the Cotyledons of Germinating Lentils. JORGE FERNÁNDEZ TÁRRAGO AND GREGORIO NICOLÁS
622 Adaptation of Nitrogen Fixation by Intact Soybean Nodules to Altered Rhizosphere pO_2. JEROME G. CRISWELL, ULYSSES D. HAVELKA, BRUNO QUEBEDEAUX, AND RALPH W. F. HARDY
626 Dormancy in Seeds of Charlock (*Sinapis arvensis* L.). Early Effects of Gibberellic Acid on the Synthesis of Amino Acids and Proteins. MIRIAM EDWARDS
631 Water Stress, Rapid Polyribosome Reductions and Growth. PATSY R. RHODES AND KAORU MATSUDA
636 Turgor Pressure Sensing in Plant Cell Membranes. HANS G. L. COSTER, ERNST STEUDLE, AND ULRICH ZIMMERMANN
644 Superoxide Dismutase in Ripening Fruits. JAMES EARL BAKER
648 Free Methionine Levels in *rin* and Normal Isogenic Tomato Fruits Ripened in the Field or in Storage. ALFREDO GONZALEZ, PATRICK E. BRECHT, AND CAROLE C. REHKUGLER
651 Diurnal and Seasonal Patterns of Photosynthesis and Respiration by Stems of *Populus tremuloides* Michx. KNOWLTON C. FOOTE AND MICHAIL SCHAEDLE
656 Isolation of Vacuoles from Root Storage Tissue of *Beta vulgaris* L. ROGER A. LEIGH AND DANIEL BRANTON
663 Regulation of Senescence in Carnation (*Dianthus caryophyllus*). Effect of Abscisic Acid and Carbon Dioxide on Ethylene Production. SHIMON MAYAK AND DAVID R. DILLEY
666 Metabolism of Indole-3-Acetic Acid. III. Identification of Metabolites Isolated from Crown Gall Callus Tissue. CHAO-SHIEUNG FEUNG, ROBERT H. HAMILTON, AND RALPH O. MUMMA
670 Studies on Acidification of Media by *Avena* Stem Segments in the Presence and Absence of Gibberellic Acid. FREDERICK V. HEBARD, STEVEN J. AMATANGELO, P. DAYANANDAN, AND PETER B. KAUFMAN
675 Membrane-bound UDP-Glucose. Lipid Glucosyltransferases from Peas. RAFAEL PONT LEZICA, PEDRO A. ROMERO, AND MARCELO A. DANKERT
681 Endogenous Abscisic Acid in Relation to Bud Growth in Alternate Bearing 'Valencia' Orange. WINSTON W. JONES, CHARLES W. COGGINS, JR., AND TOM W. EMBLETON
683 Immunological Similarities of Proteinase Inhibitors from Potatoes. CLARENCE A. RYAN AND KARLHEINZ SANTARIUS
686 Red Light-enhanced Phytochrome Pelletability. Re-examination and Further Characterization. LEE H. PRATT AND DIETER MARMÉ
693 Microbodies from *Spirogyra*. Organelles of a Filamentous Alga Similar to Leap Peroxisomes. HELMUT STABENAU
696 Seasonal Changes in Reflectance and Standing Crop Biomass in Three Salt Marsh Communities. BERT G. DRAKE
700 Kinetic Studies of the Thermal Decomposition of 2-Chloroethylphosphonic Acid in Aqueous Solution. ERIC BIDDLE, DOUGLAS G. S. KERFOOT, YIOE HWA KHO, AND KENNETH E. RUSSELL

Number 6. December

703 Protein Bodies from the Endosperm of Castor Bean. Subfractionation, Protein Components, Lectins, and Changes during Germination. RICHARD J. YOULE AND ANTHONY H. C. HUANG
710 Protein Bodies of Castor Bean Endosperm. Isolation, Fractionation, and the Characterization of Protein Components. RAYMOND E. TULLY AND HARRY BEEVERS
717 pH Changes in the Cytoplasm of the Blue-Green Alga *Anacystis nidulans* Caused by Light-dependent Proton Flux into the Thylakoid Space. GERNOT FALKNER, FRANZ HORNER, KARL WERDAN, AND HANS W. HELDT
719 Synthesis of Proteins by Isolated *Euglena gracilis* Chloroplasts. AUREA C. VASCONCELOS
722 Polygalacturonases Release Cell-Wall-bound Proteins. LARRY L. STRAND, CAROL RECHTORIS, AND HARRY MUSSELL
726 Relationships between Carbon Dioxide, Malate, and Nitrate Accumulation and Reduction in Corn (*Zea mays* L.) Seedlings. CARLOS A. NEYRA AND RICHARD H. HAGEMAN
731 Nitrate Reductase Activity in Soybeans (*Glycine max* [L.] Merr.). I. Effects of Light and Temperature. JOSEPH C. NICHOLAS, JAMES E. HARPER, AND RICHARD H. HAGEMAN
736 Nitrate Reductase Activity in Soybeans (*Glycine max* [L.] Merr.). II. Energy Limitations. JOSEPH C. NICHOLAS, JAMES E. HARPER, AND RICHARD H. HAGEMAN
740 Malate Dehydrogenase and NAD Malic Enzyme in the Oxidation of Malate by Sweet Potato Mitochondria. RANDOLPH T. WEDDING, M. KAY BLACK, AND DENNIS PAP
744 Acylated Steryl Glycoside Synthesis in Seedlings of *Nicotiana tabacum* L. WAYNE FRASCH AND CLAUS GRUNWALD
749 Cytokinins in *Corynebacterium fascians* Cultures. Isolation and Identification of 6-(4-Hydroxy-3-methyl-*cis*-2-butenylamino)-2-methylthiopurine. DONALD J. ARMSTRONG, EMANUEL SCARBROUGH, FOLKE SKOOG, DOUGLAS L. COLE, AND NELSON J. LEONARD

753 Regulatory Properties of the ADP-Glucose Pyrophosphorylase of the Blue-Green Bacterium *Synechococcus* 6301. CAROLYN LEVI AND JACK PREISS
757 Light-dependent Elongation of Anaerobically Maintained Green Pea Stem Segments and Its Implications. DAVID J. PARRISH AND PETER J. DAVIES
761 Comparison of the Photosynthetic Characteristics of Three Submersed Aquatic Plants. THAI K. VAN, WILLIAM T. HALLER, AND GEORGE BOWES
769 Differential Effects of Actinomycin D and Cordycepin in Lettuce Seed Germination and RNA Synthesis. KAR-LING TAO AND ANWAR A. KHAN
773 Ribulose Diphosphate Carboxylase Synthesis in *Euglena*. III. Serological Relationships of the Intact Enzyme and Its Subunits. RICHARD H. BROWN, TERENCE L. ARMITAGE, AND MICHAEL J. MERRETT
777 Comparison of Three Phytochrome-mediated Processes in the Hypocotyl of Mustard. ALAN M. KINNERSLEY AND PETER J. DAVIES
783 Effects of Inorganic Solutes on the Binding of Auxin. B. W. POOVAIAH AND A. CARL LEOPOLD
786 Anomalous Temperature Dependence of Seedling Development in Some Soybean (*Glycine max*. [L.] Merr.) Cultivars. Role of Ethylene. CYRUS SAMIMY AND CLIFFORD E. LAMOTTE
790 Abscisic Acid Metabolism by a Cell-free Preparation from *Echinocystis lobata* Liquid Endoserum. DOUGLAS F. GILLARD AND DANIEL C. WALTON
796 Contribution of Arginine to Proline Accumulation in Water-stressed Barley Leaves. SAMUEL F. BOGGESS AND CECIL R. STEWART
798 Altered Nitrogenous Pools Induced by the *Azolla-Anabaena Azolla* Symbiosis. JACK W. NEWTON AND JAMES F. CAVINS
800 Photoperiodic Control of Apical Senescence in a Genetic Line of Peas. WILLIAM M. PROEBSTING, PETER J. DAVIES, AND G. A. MARX
803 Photoaffinity-labeled Cytokinins. Synthesis and Biological Activity. JANE B. THEILER, NELSON J. LEONARD, RUTH Y. SCHMITZ, AND FOLKE SKOOG

Subject Index

A

Abscisic acid
  effect on carnation senescence, 663
  effect on induction of phenolics and anthocyanin, 468
  in orange buds, 681
  in senescing citrus peel, 377
  in senescing rose petals, 175
  in soybean, 363
  leaf age and, in *Xanthium strumarium* L., 169
  metabolism by *Echinocystis lobata* liquid endoserum, 790
  modulation of lettuce seed pregermination protein synthesis, 530
  sucrose and, in senescing rose petals, 175
  water stress and, in senescing rose petals, 175
Abscission zones, red kidney bean, 324
Absorbance changes, correlation with induction of O_2 evolution in bean leaves greened by brief flashes, 371
Acid pH, root elongation and, 599
Acidification media, by *Avena* stem segments, 670
Actinomycin D, effect on lettuce seed germination and RNA synthesis, 769
Acyl-steryl glycoside synthesis in tobacco seedlings, 744
Adenosine diphosphate
  extraction from tissues, 320
  glucose pyrophosphorylase, *Synechococcus*, 753
Adenosine triphosphatase
  cation-stimulated, in corn roots, 331
  extraction from tissues, 320
  stimulation of CO_2 fixation in pea chloroplast, 156
Adenylates, effect on malate oxidation in isolated mung bean mitochondria, 438
Agave deserti
  photosynthesis, 576
  water relations, 576
Aging
  leaf, ABA content, transpiration, stomatal conductance, and, 169
  potato mitochondria, 147
Agrobacterium tumefaciens B_6
  developmental effects on moss, 107
  DNA, in crown gall tumor tissue, 100
Albizzia julibrissin, Cl^- and K^+ flux during rhythmic leaf movement, 190
Aleurone layers, barley, cell wall hydrolyzing enzymes, 380
Alga
  blue-green
    glucose dehydrogenase, 393
    glycolate dehydrogenase localization, 199
    pH changes, 717
  filamentous, organelles, 693
  green, 1,3-β-glucan, 459
  marine green, chloroplast, NADP-dependent glutamate dehydrogenase in, 283
Amino acid
  -IAA conjugates, 666
  leakage, variation with temperature related to membrane phase change, 7
  synthesis, GA effect on, 626
Ammonium, influence on growth and nitrate reductase of Paul's Scarlet rose, 152
Anacystis nidulans, pH changes, 717
Anthocyanin
  induction, 468
  synthesis, photocontrol of, 214
Apple, cobaltous ion inhibition of ethylene production, 114
Aquatic plants, photosynthesis, 761
Arginine metabolism in wilted barley leaves, 796
Aspartate-α-ketoglutarate transaminase isozymes in spinach, 110
Aspartate transcarbamylase in etiolated plant tissue
  protein synthesis and, 232
  RNA inhibitors and, 232
Aspen stem
  photosynthesis, 91, 651
  respiration, 91, 651
Auxanometer, photometric, 253
Auxin
  binding, inorganic solutes and, 783
  decrease in free space pH, 203
  effect on *Valonia utricularis* turgor pressure regulation, 608
  elongation responses to, 402, 599
  growth in maize and pea, 203
  -induced ultrastructural alteration of plasma membranes, 544
Avena
  coleoptile, hormone-induced H^+ excretion, 210
  gibberellins in, 131
  IAA esters, 60
  stem segments, media acidification by, 670
Azolla-Anabaena azollae
  H_2 production, 119
  symbiosis, 798

B

Bacteria
  blue-green, regulatory properties of ADP-glucose pyrophosphorylase, 753
  on moss, 107
Bacterial DNA, in tumor tissue, 100
Bark, aspen
  photosynthesis, 91, 651
  respiration, 91, 651
Barley
  aleurone layers, cell wall hydrolyzing enzymes, 380
  leaf
    arginine metabolism, 796
    nitrate distribution, 588
  protochlorophyllide holochrome, 43
  roots, regulation of K^+ absorption, 33
Bean
  castor, protein bodies, 703, 710
  leaf
    flashed, induction of O_2 evolution, 371
    primary photochemistry development, 526
  metabolism, naphthenic acid effects on, 82
  mung
    cobaltous ion inhibition of ethylene production, 114
    cotyledons, protease inhibitor in, 1
    cysteinyl-tRNA synthetase use of selenocysteine, 248
    mitochondria, citric acid cycle activity, 426
    mitochondria, malate oxidation, 433, 438
  photosynthesis in mesophyll, 186
  pod, suberization during wound-healing, 411
  protochlorophyllide holochrome, 43
  red kidney, plasma membrane-bound cellulase from abscission zones, 324
  seed, affinity chromatography of globulins, 272
Beet
  mitochondria, NADH oxidation, 38
  root storage tissue, isolation of vacuoles, 656
Beet, sugar
  leaf, ethylene formation, 163
  metabolism, naphthenic acid effects on, 82
Benzyladenine effects on microbody and mitochondria enzymes, 569
Biomass, standing crop in salt marsh, seasonal changes, 696
Bud, orange, ABA in, 681
Bundle sheath plastids, corn, thylakoid proteins, 345

C

C_3 and C_4 plant tissue cultures, photorespiration, 573
Cabbage, red, seedling, photocontrol of anthocyanin synthesis, 214
Calcium ion-induced ultrastructural alteration of plasma membranes, 544
Callus
  crown gall, IAA metabolism, 666
  potato tuber, 464
  tobacco, GA_{20} metabolism, 387
Carbohydrates
  cellular, in *Flammulina velutipes*, 485
  corn, 28
Carbon
  isotope ratios in CAM plants, 367
  metabolism, photosynthetic, in parenchyma of *Vicia faba* L., 186
Carbon dioxide
  assimilation, O_2 photoreduction and, 336
  compensation point
    in naphthenate-treated plants, 82
    in soybean, 143
  effect on carnation senescence, 663
  fixation
    dark, in CAM, 288
    in naphthenate-treated plants, 82
    stimulation by ATP, 156
  -malate, nitrate metabolism and, 726
Carnation senescence, 663
Cation-ATPase, corn root, 331
Caulerpa simpliciuscula, 1,3-β-glucan, 459
Cauliflower nuclei, DNA-dependent RNA polymerases from, 453

Cell
corn, dithioerythritol effects on potentials and resistance, 276
guard, protoplasts, 492
membrane, turgor pressure sensing, 636
tobacco, sulfate transport, 358
wall
elasticity, effect on *Valonia utricularis* turgor pressure regulation, 608
Fucus zygote, polysaccharide components, 224
hydrolyzing enzymes in barley aleurone layers, 380
Cellulase, plasma membrane-bound, from red kidney bean, 324
Ceratocystis fimbriata, furano-terpene induction in sweet potato injured by, 51
Charlock seeds, dormancy, 626
Chemicals, toxic, furano-terpene induction in sweet potato injured by, 51
Chlamydobotrys, enzyme levels and obligate phototrophy, 179
Chlamydomonas
greening, photosystem II development during, 257
mitochondria, cytochemical localization of glycolate dehydrogenase, 315
Chloramphenicol, effect on circadian rhythm of *Neurospora crassa*, 592
Chloride fluxes during rhythmic leaf movement of *Albizzia julibrissin*, 190
2-Chloroethylphosphonic acid, thermal decomposition, 700
Chlorophyll, in gymnosperm chloroplasts, 341
Chloroplast
Caulerpa simpliciuscula, NADP-dependent glutamate dehydrogenase, 283
citrus peel, ABA formation and, 377
envelope membranes, lipid and fatty acid composition, 595
Euglena gracilis
polypeptides, 87
protein synthesis, 719
gymnosperm, chlorophyll in, 341
orientation, *Ulva* rhythm, 17, 22
pea
CO_2 fixation, 156
light inactivation of glucose-6-phosphate dehydrogenase, 135
separation from spinach leaf protoplasts, 309
Chromatography, affinity, of bean globulins, 272
Circadian rhythm
of *Neurospora crassa*, 592
of *Samanea* pulvini, 417, 421
Citric acid cycle activity, in mung bean mitochondria, 426
Citrus peel senescing, ABA formation, 377
Clinostat, horizontal, as gravity compensator, 127
Cobaltous ion inhibition of ethylene production, 114
Coleoptile, *Avena*, hormone-induced H^+ excretion, 210
Coleus blumei petiole epinasty, 513
Cordycepin effect on lettuce seed germination and RNA synthesis, 769
Corn
auxin-induced growth, 203
carbohydrates, 28
enzymes, 28
leaf, nitrate reductase activity, 499, 505
metabolism, naphthenic acid effects on, 82
roots
cation-ATPase in, 331
dithioerythritol effects on cell potentials, cell resistance, and proton fluxes, 276
seedlings, CO_2-malate and nitrate metabolism in, 726
thylakoid proteins of mesophyll and bundle sheath plastids, 345
Corynebacterium fascians cytokinins, 749
Cotton
cotyledons, nitrate reductase, 95
ethylene action inhibitor, 268
Cotyledon
cotton, nitrate reductase, 95
cucumber, microbody malate dehydrogenase isozyme, 447
lentil, starch degradation, 618
mung bean, protease inhibitors, 1
onion, guard cell protoplast production, 492
sunflower, BA effect on mitochondria and microbody enzymes, 569
tobacco, guard cell protoplast production, 492
Cowpea, aspartate transcarbamylase activity, 232
Crassulacean acid metabolism plants
carbon isotope ratios, 367
dark fixation of CO_2, 288
photosynthesis, 576
water relations, 576
Crown gall tumor tissue
bacterial DNA, 100
callus, IAA metabolism, 666
Parthenocissus tricuspidata, oxindole pathway, 77
Cucumber
ABA metabolism, 790
cotyledons, microbody malate dehydrogenase isozyme, 447
seed, kaurene oxidation, 473, 479
Cyanide
-induced electropotential in *Mnium*, 240
respiration and, 47
Cytokinins
modulation of lettuce seed pregermination protein synthesis, 530
on *Corynebacterium fascians*, 749
on moss, 107
photoaffinity-labeled, 803
Cytoplasm
Anacystis nidulans, pH changes, 717
pea, light inactivation of glucose-6-phosphate dehydrogenase, 135

D

Dark fixation of CO_2 in CAM plants, 288
Dark respiration, *Rumex patientia*, UV radiation and, 563
Decomposition, thermal, of 2-chloroethylphosphonic acid, 700
Dehardening, dogwood, osmotic factors, 243
Deoxyribonucleic acid
bacterial, in crown gall tumor tissue, 100
-dependent RNA polymerases from cauliflower nuclei, 453
Digitalis purpurea seedlings, annual variation in sterol content, 541
Dogwood, osmotic factors of dehardening, 243
Dormancy in charlock seeds, 626
Dunaliella parva nitrate reductase, specificity for NADH and NADPH, 57

E

Electron transfer components of kaurene oxidation in cucumber, 479
Electropotential, cyanide-induced, in *Mnium*, 240
Elongation (*see* Growth)
Endopeptidase inhibitor in mung bean cotyledons, 1
Endosperm, castor bean, protein bodies, 703, 710
Energy limitations, effect on nitrate reductase activity in soybeans, 736
Enzyme
cell wall hydrolyzing, in barley aleurone layers, 380
corn, 28
levels, obligate phototrophy in *Chlamydobotrys* and, 179
microbody, BA effect on, 569
mitochondria, BA effect on, 569
NAD malic, malate dehydrogenase and, 740
proteolytic, in wheat, 516
system, in sweet potato root tissue, 51
Epinasty, petiole, IAA and, 513
Esters, *Avena* IAA, 60
Ethylene
action inhibitor, 268
IAA distribution in petiole epinasty effected by, 513
-induced ABA formation in citrus peel, 377
production
effect of ABA and CO_2 on, 663
in sugar beet leaves, 163
inhibition by cobaltous ion, 114
respiration and, 47
temperature dependence of soybean seedling development and, 786
Euglena gracilis
chloroplasts
polypeptides, 87
protein synthesis, 719
serology of ribulose diphosphate carboxylase, 773

F

Fatty acid composition of chloroplast envelope membranes, 595
Fir, Douglas, IAA in, 299
Flammulina velutipes, cellular carbohydrates, 485
Fruit
ripening, superoxide dismutase in, 644
tissues, induction of phenolics and anthocyanin in, 468
tomato
methione levels, 648
suberization during wound-healing, 411
Fruitbodies, *Flammulina velutipes*, cellular carbohydrates, 485
Fucus zygotes, polysaccharide components of cell wall, 224
Furano-terpene induction in sweet potato, 51

G

Galactosyl transferase, osmotic regulation of *Ochromonas* and, 295
Germination
castor bean, 703
lettuce seed, 530, 769
variation with temperature related to membrane phase change, 7

Gibberellins
A_4, conversion to GA_1 and GA_{34}, 68
A_{20}, metabolism in tobacco callus, 387
Avena, 131
cell wall hydrolyzing enzyme production in barley aleurone layers in response to, 380
effect on synthesis of amino acids and proteins, 626
media acidification by *Avena* stem segments in presence and absence of, 670
modulation of lettuce seed pregermination protein synthesis, 530
pine pollen, 68
polarity, 131
Globulins, bean, affinity chromatography, 272
1,3-β-Glucan, *Caulerpa simpliciuscula*, 459
Glucose (*see also* Adenosine diphosphate glucose: Uridine diphosphate glucose)
effect on nitrate distribution in barley leaves, 588
metabolism and uptake by *Neocosmospora vasinfecta* E. F. Smith, 193
Glucose dehydrogenase from *Nostoc*, 393
Glucose-6-phosphate dehydrogenase, light modulation, 135
Glucosyltransferase, lipid, from peas, 675
Glutamate dehydrogenase, NADP-dependent, in *Caulerpa simpliciuscula* chloroplasts, 283
Glycolate dehydrogenase
cytochemical localization in *Chlamydomonas* mitochondria, 315
intracellular localization in *Oscillatoria*, 199
Grapevine leaf, induction of phenolics and anthocyanin, 468
Gravity compensator, horizontal clinostat as, 127
Greening
bean leaves, etiolated, photochemistry development during, 526
Chlamydomonas reinhardi y-1, photosystem II development during, 257
Growth
acid pH and, 599
ammonium and, in Paul's Scarlet rose, 152
auxin and, 402, 599
light-dependent, of pea stem, 757
-limiting proteins in soybean, 402
orange bud, ABA and, 681
pH and, 599
Rumex patientia, UV radiation and, 563
stimulation by naphthenic acid, 82
tobacco on ammonia, organic acid role during, 510
transitions in soybean, modulation of RNA polymerase I during, 614
water stress and, 537, 631
Gymnosperm chloroplasts, chlorophyll in, 341

H

Holochrome, protochlorophyllide, protein moiety of, 43
Horizontal clinostat as gravity compensator, 127
Hormone-induced H^+ excretion, 210
Hydrogen
excretion, hormone-induced, kinetics, 210
production by *Azolla-Anabaena azollae*, 119
3-Hydroxytyramine stimulation of ethylene formation in wounded sugar beet leaves, 163
Hypocotyl
mung bean mitochondria, citric acid cycle activity, 426
mustard, phytochrome control, 777
soybean, plasma membrane microviscosity, 548
Hyptis emoryi leaf, photosynthetic rates, 218

I

Indoleacetic acid
distribution in petiole epinasty, 513
esters from *Avena* seeds, 60
in Douglas fir, 299
metabolism, 77, 666
plasma membrane microviscosity and structure effected by, 548
Inflorescence, *Avena*, gibberellins in, 131
Internode, *Avena*, gibberellins in, 131
Ion transport in plasma membrane vesicles of oat roots, 304
Isocitrate lyase, obligate phototrophy in *Chlamydobotrys* and, 179
Isopentenyl pyrophosphate in sweet potato root tissue, 51
Isozymes, aspartate-α-ketoglutarate transaminase in spinach, 110

J

Jade leaf, suberization during wound-healing, 411

K

Kalanchoë fedtschenkoi, malate label equilibration during dark fixation of CO_2 in, 288
Kaurene oxidation
cofactor requirements, 473
electron transfer components, 479
Kranz anatomy, low respiration in C_4 plants associated with, 573

L

Leaf
age, ABA-content, transpiration, stomatal conductance and, 169
Albizzia julibrissin, Cl^- and K^+ flux during rhythmic movement, 190
Avena, gibberellins in, 131
barley
arginine metabolism, 796
nitrate distribution, 588
protochlorophyllide holochrome, 43
bean
flashed, induction of O_2 evolution, 371
primary photochemistry development, 526
protochlorophyllide holochrome, 43
corn, nitrate reductase activity, 499, 505
grapevine, inductiion of phenolics and anthocyanin, 468
Hyptis emoryi, photosynthetic rates, 218
Jade, suberization during wound-healing, 411
pea, light inactivation of glucose-6-phosphate dehydrogenase in chloroplast, 135
peroxisomes, organelles of a filamentous alga similar to, 693
petiole, *Coleus blumei*, epinasty, 513
Samanea, circadian rhythmicity, 417, 421
soybean, expansion, 12
spinach
aspartate-α-ketoglutarate transaminase isozymes, 110
protoplasts, chloroplast and organelle separation from, 309
sugar beet, ethylene formation, 163
tissue permeability, inorganic salts and, 182
Xanthium strumarium L., 169
Lectins, castor bean, 703
Lentil cotyledons, starch degradation, 618
Lettuce seed
germination, 530, 769
RNA synthesis, 769
Light
-dependent growth of pea stem, 757
-dependent proton flux into thylakoid space, pH changes in *Anacystis nidulans* caused by, 717
modulation of glucose-6-phosphate dehydrogenase, 135
nitrate distribution in barley leaves effected by, 588
nitrate reductase activity in soybeans effected by, 731
red, -enhanced phytochrome pelletability, 686
transmittance change in *Ulva*, 17
white, rhythmic leaf movements and, 417
Lipid
chloroplast envelope membranes, 595
glucosyltransferases from peas, 675

M

Maize (*see* Corn)
Malate
CO_2, nitrate metabolism and, 726
equilibration of label during dark fixation of CO_2 in CAM, 288
oxidation
in isolated mung bean mitochondria, 433, 438
in sweet potato mitochondria, 740
Malate dehydrogenase
isozyme microbody, in cucumber cotyledons, 447
NAD malic enzyme and, in malate oxidation by sweet potato mitochondria, 740
Marah macrocarpus (*see* Cucumber)
Mevalonate, in sweet potato root tissue, 51
Membrane
-bound UDP-glucose from peas, 675
cell, turgor pressure sensing in, 636
chloroplast envelope, lipid and fatty acid composition, 595
microviscosity, plasma, IAA effects on, 548
permeation in seeds, 7
structure, plasma, IAA effects on, 544
Mesophyll
bean, photosynthesis, 186
corn, thylakoid proteins, 345
Metabolism
ABA, by *Echinocystis lobata* liquid endosperm, 790
air-dry seeds of charlock, water potential and, 237
arginine, in wilted barley leaves, 796
bean, naphthenic acid effects on, 82
carbon, photosynthetic, in parenchyma of *Vicia faba* L., 186
corn, naphthenic acid effects on, 82

Metabolism—*continued*
Crassulacean acid plants
carbon isotope ratios, 367
dark fixation of CO_2, 288
GA_{20}, in tobacco callus, 387
glucose, in *Neocosmospora vasinfecta* E. F. Smith, 193
IAA, 77, 666
nitrate
CO_2-malate and, 726
temperature and, 12
nitrogen
in plant cell suspension cultures, 510
in soybean, 350
poly(A), in plant cells, 405
spring wheat, naphthenic acid effects on, 82
sugar beet, naphthenic acid effects on, 82
Methione levels, in *rin* and normal tomato, 648
Methylthiozeatin, in *Corynebacterium* cultures, 749
Microbody
enzymes, BA effect on, 569
malate dehydrogenase isozyme in cucumber cotyledons, 447
Spirogyra, 693
Mitochondria
beetroot, NADH oxidation, 38
Chlamydomonas, cytochemical localization of glycolate dehydrogenase, 315
enzymes, BA effect on, 569
mung bean
citric acid cycle activity, 426
malate oxidation, 433, 438
potato, aging, 147
respiratory chain, 521
sweet potato, malate oxidation, 740
Mnium, cyanide-induced electropotential, 240
Moss
bacteria on, 107
cytokinins on, 107
Mustard hypocotyl, phytochrome control, 777
Mycelium, *Flammulina velutipes*, cellular carbohydrates, 485

N

Naphthenic acid, as growth stimulator, 82
Neocosmospora vasinfecta E. F. Smith, uptake and metabolism of D-glucose, 193
Neurospora crassa, circadian rhythm, 592
Nicotinamide adenine dinucleotide
malic enzyme, malate dehydrogenase and, 740
phosphate-dependent glutamate dehydrogenase in *Caulerpa simpliciuscula* chloroplasts, 283
Nicotinamide adenine dinucleotide, reduced
Dunaliella parva nitrate reductase specificity for, 57
nitrate reductases in rice seedlings, 292
oxidation by beetroot mitochondria, 38
phosphate
Dunaliella parva nitrate reductase specificity for, 57
nitrate reductases in rice seedlings, 292
Nitrate
distribution in barley leaves, 588
effect on induction of phenolics and anthocyanin, 468
flux, regulation of nitrate reductase activity in corn leaves, 499, 505
metabolism
CO_2-malate and, 726
temperature and, 12
Nitrate reductase
ammonium and, in Paul's Scarlet rose, 152
correlation with plant nitrogen, 583
Dunaliella parva, specificity for NADH and NADPH, 57
in barley leaves, 588
in corn leaves, 499, 505
in cotton cotyledons, 95
in rice seedlings, 292
in soybeans, 731, 736
regulation by nitrate flux in corn leaves, 499, 505
Nitrogen
fixation, adaptation to altered rhizosphere pO_2, 622
metabolism
in plant cell suspension cultures, 510
in soybean, 350
Nitrogenase-catalyzed H_2 production, 119
Node, *Avena*, gibberellins in, 131
Nodules, soybean, nitrogen fixation adaptation, 622
Nostoc, glucose dehydrogenase, 393

O

Oat root, passive ion transport in plasma membrane vesicles, 304
Obligate phototrophy in *Chlamydobotrys*, enzyme levels and, 179
Ochromonas, osmotic regulation, activation of a galactosyl transferase, 295
Onion cotyledons, guard cell protoplast production, 492
Orange bud, ABA in, 681
Orchid, ethylene action inhibitor, 268
Organelle
isolation from spinach leaf protoplasts, 309
-specific isozymes of aspartate-α-ketoglutarate transaminase in spinach leaves, 110
Organic acid, role during tobacco growth on ammonia, 510
Oscillatoria, glycolate dehydrogenase localization, 199
Oxaloacetate, effect on malate oxidation in isolated mung bean mitochondria, 433
Oxidation
kaurene
cofactor requirements, 473
electron transfer components, 479
malate, by sweet potato mitochondria, 740
Oxygen
evolution, induction in flashed bean leaves, 371
nitrogen fixation, 622
photoreduction, 336
response of photosynthesis, 552

P

Panicum maximum, phosphoenolpyruvate carboxykinase, 603
Panicum milioides, oxygen response of photosynthesis, 552
Parenchyma, *Vicia faba* L., photosynthetic carbon metabolism, 186
Parthenocissus tricuspidata crown gall tissue, oxindole pathway, 77
Pea
apical senescence, 800
auxin-induced growth, 203
chloroplast
CO_2 fixation, 156
light inactivation system effect on, 135
cytoplasm, light inactivation system effect on, 135
ethylene action inhibitor, 268
light inactivation of glucose-6-phosphate dehydrogenase, 135
lipid glucosyltransferases, 675
poly(A) metabolism, 405
ribosyl-*cis*-zeatin in leucyl transfer RNA species, 140
stem, light-dependent growth, 757
Peel, citrus, senescing, ABA formation, 377
Permeability, tissue, inorganic salts and, 182
Peroxisomes, leaf, 693
Petal, rose, ABA content, 175
Petiole epinasty, IAA and, 513
pH
changes in *Anacystis nidulans*, 717
free space, auxin-induced decrease, 203
root elongation and, 599
Phenolics, induction, 468
Phenoloxidase stimulation of ethylene formation in wounded sugar beet leaves, 163
Phloem, osmotically driven pressure flow, 556
Phosphoenolpyruvate carboxykinase from *Panicum maximum*, 603
Photoaffinity-labeled cytokinins, 803
Photometric auxanometers, 253
Photoreduction of O_2, 336
Photorespiration in C_3 and C_4 plant tissue cultures, 573
Photosynthesis
in *Agave deserti*, 576
in anthocyanin synthesis, 214
in aquatic plants, 761
in aspen stem, 91, 651
in bean leaves, 526
in bean mesophyll, 186
in chloroplast envelope, 595
in *Hyptis emoryi* leaves, 218
in *Rumex patientia*, UV radiation and, 563
in trees, 341
oxygen response, 552
Photosynthetically driven H_2 production, 119
Photosystem II, development during greening of *Chlamydomonas reinhardi*, y-1, 257
Phytochrome
control in mustard hypocotyl, 777
pelletability, red light-enhanced, 686
Samanea leaf circadian rhythmicity and, 421
Pine pollen gibberellins, 68
Plasma membrane
-bound cellulase, from red kidney bean, 324
microviscosity, IAA effects on, 548
structure, IAA effects on, 544
vesicles, oat root, passive ion transport, 304
Pod, bean, suberization during wound-healing, 411
Pollen, pine, gibberellins, 68
Polyadenylic acid metabolism, in plant cells, 405
Polygalacturonases, protein release, 722
Polymerases, RNA, DNA-dependent, from cauliflower, 453
modulation during growth transitions, 614

Polyribosome reductions, water stress and, 631
Polysaccharide components of *Fucus* zygote cell wall, 224
Polysome, free and membrane-bound, poly(A) associated with, 405
Potassium
-linked chloride fluxes during rhythmic leaf movement of *Albizzia julibrissin*, 190
regulation of absorption in barley roots, 33
Potato
mitochondria, aging, 147
proteinase inhibitors, immunological similarities, 683
tuber, callus, 464
Pressure
flow, osmotically driven, in phloem, 556
turgor
rgulation in *Valonia utricularis*, 608
-sensing mechanism, 636
Proline synthesis, water stress and, 398, 796
Protease inhibitors in mung bean cotyledons, 1
Protein
bean seed, affinity chromatography, 272
bodies, of castor bean endosperm, 703, 710
cell wall-bound, release by polygalacturonases, 722
elongation-limiting, in soybean, 402
moiety of protochlorophyllide holochrome, 43
synthesis
by *Euglena* chloroplasts, 719
effect on aspartate transcarbamylase in etiolated plant tissue, 232
gibberellic acid effect on, 626
pregermination, modulation in lettuce seed, 530
thylakoid, of corn mesophyll and bundle sheath plastids, 345
Proteinase inhibitors, potato, immunological similarities, 683
Protochlorophyllide holochrome, protein moiety, 43
Proton fluxes, corn, dithioerythritol effects, 276
Protoplast, spinach leaf, isolation of chloroplasts and organelles, 309
Pyruvate effect on malate oxidation in isolated mung bean mitochondria, 433

R

Radiation, UV, *Rumex patientia* photosynthesis, growth, and dark respiration effected by, 563
Reflectance, seasonal changes, in salt marsh, 696
Respiration
aspen stem, 91, 651
cyanide effects on, 47
dark, *Rumex patientia*, UV radiation and, 563
ethylene effects on, 47
naphthenate-treated bean embryo, 82
Respiratory chain, plant mitochondria, 521
Rhizosphere, pO_2, nitrogen fixation adaptation to, 622
Ribonucleic acid
inhibitors, effect on aspartate transcarbamylase in etiolated plant tissue, 232
iodination, 71
polymerases
DNA-dependent, from cauliflower nuclei, 453
modulation during growth transitions, 614
synthesis, lettuce seed, 769
transfer
cysteinyl-synthetase use of selenocysteine, 248
ribosyl-*cis*-zeatin in, 140
Ribosyl-*cis*-zeatin in transfer RNA, 140
Ribosyl-zeatin, developmental effects on moss, 107
Ribulose diphosphate carboxylase
obligate phototrophy in *Chlamydobotrys* and, 179
synthesis in *Euglena gracilis*, 773
Rice seedlings, NADH- and NAD(P)H-nitrate reductases, 292
Root
barley, regulation of K^+ absorption, 33
beet, storage tissue, isolation of vacuoles, 656
corn
cation-ATPase, 331
dithioerythritol effects on cell potentials, cell resistance, and proton fluxes, 276
oat, passive ion transport in plasma membrane vesicles, 304
sweet potato, furano-terpene induction, 51
tissue permeability, inorganic salts and, 182
Rose
Paul's Scarlet, ammonium influence on growth and nitrate reductase, 152
petal, ABA content, 175
Rumex patientia, UV radiation and, 563

S

Salt, inorganic, tissue permeability and, 182
Salt marsh reflectance, 696
Samanea leaf, circadian rhythmicity, 417, 421
Seed
Avena, IAA esters, 60
bean, affinity chromatography of globulins, 272
charlock
dormancy, 626
metabolism as function of water potential, 237
cucumber, kaurene oxidation, 473, 479
lettuce, germination, 530, 769
membrane permeation, 7
Seedling
corn, CO_2-malate and nitrate metabolism, 726
Digitalis purpurea, annual variation in sterol content, 541
red cabbage, photocontrol of anthocyanin synthesis, 214
rice NADH- and NAD(P)H-nitrate reductases, 212
soybean
development, temperature dependence, 786
leaf expansion, 12
nitrate metabolism, 12
RNA polymerase I modulation, 614
tobacco, acyl-steryl glycoside synthesis, 744
tomato, photocontrol of anthocyanin synthesis, 214
wheat, nitrate reductase, 583
Selenocysteine, mung bean cysteinyl-tRNA synthetase and, 248
Senescence
apical, in peas, 800
carnation, 663
Sieve tube, mathematical model, 556
Soybean
ABA in, 363
aspartate transcarbamylase activity, 232
CO_2 compensation point, 143
elongation-limiting proteins, 402
hypocotyl, plasma membrane microviscosity, 548
leaf expansion, 12
nitrate metabolism, 12
nitrate reductase activity, 731, 736
nitrogen metabolism, 350
nodules, nitrogen fixation adaptation, 622
oxygen response of photosynthesis, 552
seedling
development, temperature dependence, 786
RNA polymerase I modulation, 614
urea utilization, 350
water stress, 537
Spinach
aspartate-α-ketoglutarate transaminase isozymes, 110
leaf protoplasts, chloroplast and organelle separation from 309
Spirogyra microbodies, 693
Starch degradation, in lentil cotyledons, 618
Stem
aspen
photosynthesis, 91, 651
respiration, 91, 651
Avena, media acidification, 670
pea, light-dependent growth, 757
Sterol content of *Digitalis purpurea* seedlings, annual variation, 541
Stomatal conductance, leaf age and, in *Xanthium strumarium* L., 169
Stomatal resistance, water stress and, 537
Stress, water
ABA content and, 175
barley leaves, arginine metabolism, 796
growth and, 537, 631
polyribosome reductions and, 631
proline synthesis and, 398
Suberization of aerial parts of plants, 411
Sucrose
ABA content and, 175
effect on induction of phenolics and anthocyanin, 468
rhythmic leaf movement and, 417
Sulfate transport in tobacco cells, 358
Sunflower
cotyledons, BA effect on mitochondria and microbody enzymes, 569
water stress, 537
Superoxide dismutase in ripening fruits, 644
Sweet potato
furano-terpene induction, 51
mitochondria, malate oxidation, 740
Synechococcus 6301, ADP-glucose pyrophosphorylase, 753

T

Temperature
amino acid leakage of seeds effected by, 7
dependence of soybean seedling development, 786
germination variations and, 7
membrane phase change and, 7
nitrate metabolism and leaf expansion in soybean seedlings influenced by, 12, 731

Temperature—*continued*
seed membrane structure changes induced by, 7
Terpene induction in sweet potato, 51
Thiamine pyrophosphate effect on malate oxidation in isolated mung bean mitochondria, 433
Thylakoid
fusion, correlation with induction of O_2 evolution in bean leaves greened by brief flashes, 371
proteins, of corn mesophyll and bundle sheath plastids, 345
Tobacco
callus, GA_{20} metabolism, 387
cells, sulfate transport, 358
cotyledons, guard cell protoplast production, 492
growth, on ammonia, organic acid role, 510
seedlings, acyl-steryl glycoside synthesis, 744
Tomato
fruit
rin and normal, methione levels, 648
suberization during wound-healing, 411
seedling, photocontrol of anthocyanin synthesis, 214
Transpiration, leaf age and, in *Xanthium strumarium* L., 169
Tree, photosynthesis, 341
Tuber, potato, callus, 464
Turgor pressure
regulation in *Valonia utricularis*, 608
-sensing mechanism, 636

U

Ulva rhythms, 17, 22
Urea assimilation in soybean, 351
Uridine diphosphate glucose, membrane-bound, from peas, 675

V

Valonia utricularis, turgor pressure regulation, 608
Vacuole, beet, isolation, 656
Vicia faba L., photosynthetic carbon metabolism in parenchyma, 186

W

Water
potential
low, in corn leaf, 505
metabolism as function of, 237
water stress and, 537
relations, of *Agave deserti*, 576
stress
ABA content and, 175
growth and, 537, 631
in barley leaves, arginine metabolism, 796
polyribosome reductions and, 631
proline synthesis and, 398
Wheat
proteolytic enzymes, 516
seedlings, nitrate reductase, 583
spring, naphthenic acid effects on metabolism, 82
Wounding, ethylene production in sugar beet leaves following, 163

X

Xanthium strumarium
ABA content, 169
leaf age, 169
stomatal conductance, 169
transpiration, 169

Z

Zeatin
developmental effects on moss, 107
in tRNA, 140
